

Mother's Cook Book

There is no mystery about happiness... We may encourage others by our faith and cheer, but we have no right to distribute them by doubt and gloom.

FOOD FOR THE FAMILY

THERE are all sorts of bread puddings and when well prepared are delicious. Here is:

Another Bread Pudding. Take two cupsful of bread crumbs, a cupful of sugar, a cupful of molasses, a half cupful of raisins, a dash of cinnamon and two cupsful of sweet milk. Bake half an hour, stirring often, then add four cupsful of milk and bake two hours longer. Serve hot.

Pineapple Salad. Mix sliced pineapple with equal parts of diced celery and half the quantity of shredded almonds. Serve in nests of head lettuce with mayonnaise dressing.

Ginger Bread. Take one cupful of sugar, one cupful of molasses, one-half cupful of melted lard, one teaspoonful of soda in one cupful of boiling water, one egg, three cupsful of flour. Beat the egg, add the sugar, lard and molasses with a teaspoonful of salt and a tablespoonful of ginger, then add the three cupsful of flour and when well-mixed add the boiling water and soda. Stir well and pour into a large dripping pan. Bake forty minutes.

Spinach With Cream. Wash three pounds of spinach and put to cook in a large saucepan; cook, stirring occasionally, twelve minutes; then stir through a fine sieve, saving all the liquor; add four tablespoonfuls of butter and pepper and salt to taste, cook for fifteen minutes, then add three tablespoonfuls of cream; mix well and pile in the center of a dish with crotons surrounding the spinach.

THE ROMANCE OF WORDS

"ENGINE" READERS of Chaucer who are none too familiar with the medieval meaning of the word "engine" have naturally been puzzled over the statement by the English writer that "Man hath appliances three: memorie, engin and intellect." But it should be remembered that this word, formed from the Greek "genere," to beget, and the Latin "ingenium," was understood as late as the Eighteenth century to mean talent or wit—practically a synonym for "intelligence" which is derived from the same word-root. So, for example, in Ruzbhanam, we come across the line "Such made most of their works by translation, few of their own engine," while the additional meaning of "temper" is apparent from the quotation from Fairfax's "Tasso," "His fell engine his graye eye did somewhat mitigate."

The calendar is losing importance as the average person can determine the time from the monthly bills and photograph records.

HOW TO CONTROL MOTHS IN HOMES

Pests Will Destroy Anything From Clothes to Brushes.

Washington, D. C.—Complete elimination of clothes moths from the home is difficult. They breed not only in wearing apparel, but in carpets, rugs, and upholstered furniture, a single piece of which may often furnish a steady supply of moths to restock an entire house. They can be reduced, however, in any home or establishment by using the control measures prescribed by the United States Department of Agriculture. Persons owning clothing subject to attack can afford to buy chests or cabinets that are very tight in which to store them. Trunks are usually not moth-proof. Red cedar chests when in good condition are among the tightest containers on the market. Such chests keep out the moths, and the characteristic odor of their wood kills any newly hatched or young moth larvae that may be confined in them with the clothing. Tight chests or cabinets, the walls of which can be made to absorb as much cedar oil as is found in the wood of containers of equal size, are as valuable as cedar chests. "Clothes moths are the prime offenders among fabric pests," says E. A. Black, entomologist, in a department bulletin. They Prefer Darkness. "The common clothes moths are usually seen flying in darkened corners and just beyond range of the brightest rays of the lamp. They prefer darkness. "The moths, or millers as they are often called, have imperfectly developed mouth parts and could not feed upon fabrics if they desired. Their purpose in life is merely to lay eggs that develop into the worms or larvae, which alone can cause destruction. Nevertheless, every moth killed helps to reduce infestations by preventing more eggs being laid. The moths lay their eggs in and about clothing and other objects subject to attack. From the eggs are hatched the larvae, or worms. Only the worm or larva of the clothes moth is capable of destroying fabrics. "There are two very common species of clothes moth. They are the case-making clothes moth and the webbing clothes moth. The tapestry moth is less often found, though it may become destructive. "The adult of the case-making clothes moth has a wing expanse of about half an inch. Its head and forewings are grayish yellow or buff with indistinct dark spots on the middle of the outer portions. The hind wings are white or grayish and silky. "The case-making clothes moth is so named because the larva, for its protection, makes a portable case out of spun silk and fragments of the fabric upon which it feeds. These cases attain a length of from four-sixteenths to six-eighths of an inch. The larva almost never leaves its case. The webbing clothes moth is the most abundant and injurious clothes moth. Bothered by One Type. During the last few years, practically all instances of severe clothes-moth damage reported by manufacturing plants throughout the North, including Chicago, Boston and New York, have been associated with this species. For years it has been the prevailing species in certain homes in western Massachusetts and southeastern Connecticut, hence it cannot be said that this webbing clothes moth is typically Southern in distribution, although it is often called the Southern clothes moth. "Clothes moths feed upon wool, fur, hair, feathers, and all fabrics made or factored from them. They also retard dried animal matter such as dead insects, including the dead of their own species, and untreated skins, beef-meat, casin, etc. In experimental work clothes moths have thrived best upon a diet of bristles, hair, feathers, fur, or raw wool, and not so well upon ordinary woolen cloth used in the making of wearing apparel. Notwithstanding this, the damage they cause to wearing apparel has given them a well-deserved reputation as pests. "There may be some satisfaction, however, in knowing that if the death rate among clothes moths feeding upon dyed woolen fabrics was as low as among those feeding upon raw wool, and their growth as rapid as when they feed upon bristles, furs and hair, their capacity for destruction would be increased enormously. "A single piece of hair-stuffed or feather-stuffed furniture may keep a house well stocked with clothes-moths for years."

Delicate Gown Made for Empress Eugenie

It is said that the most prettable thing ever made was the gown of Empress Eugenie designed for her to wear at a ball given at the Tuileries upon her return from the opening of the Suez canal. The ultimate in dress was made under the personal direction of the empress. Four women labored steadily for six months embroidering the gown. It took two months to manufacture the gauze. The cloth was woven on machinery especially constructed and was the only kind of this material ever fashioned. The threads were so fine that the weavers were obliged to wear powerful magnifying glasses. The dress was an ivory white. It was made with 15 skirts one upon the other. Thirty-five yards of gauze were required for each and the effect was a diaphanous mist. A thousand yards of material was used, 237 yards being required for each of the two overskirts. The flounces resembled cobwebs, and delicate embroidery in red, the low-cut waist. So fine was the material that the two overskirts could be drawn through a broder, and two of the underskirts through a finger ring. Detroit News.

Keene Won and Lost Millions of Dollars

It is to be questioned whether his tying up with Jay Gould of the \$400,000 he wagered that William Jennings Bryan would be elected in 1896 was James H. Keene's greatest error of judgment. To his close associate, Gould, Keene attributed his losses in Western Union and wheat in the late '70s. For all of his speculations over 50 years, Keene, when he died, in 1913, left but \$2,000,000 and he scored more failures in his operations than successes. After his experience with Jay Gould other reverses followed and Keene was a bankrupt in 1894. By 1892 he was on his feet again, through his manipulations for the whiskey combination and American Sugar Refining company. Later in the same decade he won and lost and won again on Brooklyn Rapid Transit, only to drop \$2,000,000 in Third Avenue railway speculations. At the time of the formation of United States Steel he hit the ceiling only to fall to the floor shortly after with the collapse of Southern Pacific. New York Times.

Home of Pineapple

The pineapple is of American origin, growing wild in Brazil and Mexico. It has been known since the sixteenth century and was first cultivated solely for royalty in the gardens of their private grounds. Brazil still possesses the best and most appreciated varieties, although in other countries much work has been done to develop a better pineapple. It is claimed that the flavor and evenness of pulp of the Brazilian pineapples have not been equaled. The season in Brazil comes in December and it has been a source of surprise to tourists arriving in Brazil during the pineapple season who some one has not undertaken to make shipments to the United States where there should be a splendid market for them, arriving in midwinter.

Mary Lost Her Tip

A newly appointed judge of the Supreme court who felt pretty well satisfied with himself was dining at a hotel and he said to the Irish waitress, "Mary, how long have you been in this country?" "Two years, sir." "Do you like it?" "Sure, it's well enough," she answered. "But, Mary," he continued, "you have many privileges in this country which you would not have in Ireland. Now at home you'd never be in a room with a Justice of the Supreme court and chatting familiarly with him." "But, sure, sir," said the girl, quite in earnest "ye'd never be a judge at home." Boston Transcript.

Had Forgotten

A Hot Springs girl recently ran across a lot of love letters written many years ago, by her mother to her father before they were married. The daughter pretended that the letters were of recent date, and read them to her mother, who was disgusted beyond measure, saying it was surprising that such silly persons were permitted to live. "I thank goodness," she said, "that when I was a girl, I had some sense." Philadelphia Inquirer.

Both Wrong

Two travelers were seated in a train going to Chicago. As the train drew up at a station one of the travelers opened the window, and drawing a deep draught of fresh air, turned to his companion and exclaimed: "Isn't this salubrious?" "Yes," replied his friend, "I think it is exhilarating." "By pardon," chimed in the conductor, "ye're both wrong; it's Kala." Boston Transcript.

Kittenish

"Those women must be a frivolous set," commented Mrs. Durmpling. "Why?" asked her overworked half. "I read in the paper that after the blaze was under control, firemen played all night on the ruins. Why didn't they go to bed like sensible folks instead of romping around like cats?" Boston Transcript.

K. C. Scholarship Examination Date

A competitive examination for the Graduate Scholarships established by the Knights of Columbus in the Catholic University will be held May 3, 1924. Applications should be filed before March 15, 1924.

Religious Training Of Young Urged By N. Y. Judges

The Mount Carmel Alumni Association will hold its eleventh annual banquet next Tuesday night in the school auditorium. Rev. Walter A. Foery, pastor of the church, will be the toastmaster and principal speaker. The committee in charge consists of Edward Muolo, Mary Ricotta, Angelina Ross, Hilda Petrossi, Sadie Mancuso, Mildred Muolo and Anthony Pulvino. The following officers have been elected: President, Frank Nigier; vice-president, Mary Petrossi; secretary, Rose Mancuso; treasurer, Michael Pastorella.

Gates Disproved Charge That He Was Careless

John W. Gates' first large scale speculative venture, barbed wire, is what many would be plungers find on their Wall Street raids. Late in the last century Gates was the main backer of two steel companies, Federal Steel and American Steel and Wire, with a total capitalization of nearly \$200,000,000. These organizations were merged with the United States Steel corporation, but Gates was refused a place with the new combination. He was told his business methods were careless, whereupon he founded the Republic Iron and Steel company, which became a thorn in the side of the United States Steel company. When Gates died in 1911 he left a fortune of nearly \$20,000,000, which disproved allegations of slipshod methods and the assertion that all plungers eventually are wiped out and become objects of charity. New York Times.

V63 CADILLAC. Even the tire carrier and triple utility lamp are constructed with a nicety of design characteristic of the newest of Cadillacs. Mabbett Motor Car Co., Inc. 137-167 Court St.

GRIP THREATENS Influenza Season at Hand. Take Every Precaution Now. This is the influenza season. A few cases have already made their appearance, and although doctors believe that the epidemic of the past few years may not appear this year, they urge the greatest caution. Colds should be treated promptly. The power of resistance should be kept normal. For both these purposes Father John's Medicine has great value. The basis of Father John's Medicine is cod liver oil scientifically prepared with other ingredients in such a way that it makes new flesh and strength, soothes the breathing passages, and helps to drive off poisonous waste matter. It does its work without narcotics or stimulants, so it is safe for children as well as older people. 68 years of experience.

Ice Imprisons Man in Ship's Crow's Nest. New York.—An icy blast of 100 miles drove spray of tall seas above the crow's nest of the Scandinavian-American liner Helig Olav, in recently from Copenhagen, and she was so tightly frozen up forward that the lookout in the crow's nest signaled for help. They rescued him with rope and tackle. The forecast was a massive ice stalagmite.

FATHER JOHN'S MEDICINE. BEST TONIC. Your Druggist can get Father John's Medicine for you if he does not have it in stock, or we will send a large size bottle by express prepaid if you send your order with \$1.20 to Father John's Medicine, Lowell, Mass.

Deaths of the Week

Funeral services were held from the respective churches on dates given. May their souls rest in peace. Hartigan—Timothy J. Hartigan died Feb. 15, 1924, at 147 Crawford street, St. Boniface Church, Feb. 15. DeVaney—Mrs. Anna DeVaney, 62 Hubbell Park, Feb. 16. Immaculate Conception Church, Feb. 19. Peters—John G. Peters, aged 53 years, died at Union Beach, N. J., Feb. 10. St. Peter and Paul's church, Feb. 21st. Dunnigan—Mrs. Anna Lawlor Dunnigan, aged 58 years, Feb. 15, 1924. St. Mary's Church, Feb. 19. Interment at Auburn, N. Y. Walters—Ellen Walters, Feb. 15. Holy Redeemer Church, Feb. 18. Bechtold—Adeline Smith Bechtold, No. 306 Pennsylvania avenue, Feb. 16. St. Francis Xavier Church, Feb. 20th. Phillips—Leo T. Phillips, aged 34 years, at Pittsford, N. Y., Feb. 15. St. Louis Church, Pittsford, Feb. 15. Fortuna—Michele Fortuna, of No. 1590 Clifford avenue, Feb. 17, aged 62 years. Mount Carmel Church, Feb. 19. Fellow—L. Fellow, of No. 74 Lowell street, died Feb. 21st. St. Bridget's Church, Feb. 23rd.

Funeral of Monsignor Liddy. Funeral services for Monsignor William M. Liddy, chancellor of the diocese of Syracuse, who died Saturday evening, was held Tuesday at 1:15 o'clock in the Cathedral of the Immaculate Conception, Syracuse. Monsignor Liddy was a graduate of St. Bernard's Seminary in this city. He was ordained at the Rochester Cathedral on June 7, 1913, after six years at St. Bernard's. At the time of his death he was one of the best known of the Roman Catholic clergymen in Northern New York.

SISTER M. THEODRIC LUDDY. Sister M. Theodric Luddy, of the order of the Sisters of Notre Dame, formerly of this city, died Tuesday night in Baltimore, Md. She leaves three sisters, Mrs. Thomas Norman and Mrs. Latham, of Washington, D. C., and two brothers, Jeremiah Luddy, S. J., of Fordham, N. Y., Luddy, of this city, and William
