Lovely Summer Hats at McGarvey's

The large variety of lovely Summer hats at McGarvey's on Main St. East, opposite East Ave., is well worth your while inspecting. The bobbed hair girl will find many snug fitting models in white and the pastel shades. There are also the graceful drooping models in large brimmed leghorns, with wreaths or flat trimming of bright flowers. For the children and the assortment is very complete. Many dainty bonnet shapes for the small girl are shown in many colorings and are worn ornamented with ruffles of fine lace or transparent braid and tiny flowers.

Many sport hats for summer are found with the scarf which has become so popular, matching the trimming on the hat. These are in peruvian shades and combinations or in price.

There are also Air rifles, Roller Skates, Pocket knives, in fact many things to delight the heart of a child.

The line of Vacuum bottles and lunch boxes for the motorist is splendid, if you are the owner of a car. Split Peas and novelty luncheon of Body Has. They are the products of America's finest batters without one of these kits. Visit this and most of them were actually made to sell for much more than the price they offer them at.

Remember McGarvey's when you are looking for the best in Hats

Dealers Use of Small Coal

With the present high price of Anthracite coal there is a growing demand for some way in which the average household may cut down its coal bill. There are many types of grates which can be used to advantage to burn the average size of Anthracite, but the small size of these are too expensive to be of value. Through the apartment houses and office buildings they are coming into more and more general use.

The McGarvey Coal Company, Inc. with offices at 8 Reynolds Arcade, have experimented to quite an extent with what is known as Buck wheat coal for small hot air, hot water and steam heaters, and the results have been very satisfactory. The main difficulty with burning small coal or pea coal is the lack of storage equipment in the average home.

It is advantageous to bank with year. The smaller coal and to mix a small portion of it with the furnace coal, except in the coldest weather when it is necessary to use the large coal alone. When the price of the fuel coal is almost six dollars less than stove coal it is well to consider and see that a considerable advantage may be effected through the use of three or four tons of stove or egg coal. Many people are using small coal this way and are getting a good or better result than ever, at a considerable less cost.

Leave your orders early for delivery as coal can not always be obtained on short notice. The McGarvey Coal Company are to be relied upon for dependable coal and their prices are as low as the other dealers. Call them at Main 3841.

Gifts at "Van" the Hardware Man

Mr. Martin VanDussen better known as "Van" the Hardware man who is located at the corner of North and Lyndhurst streets has one of the finest and most complete line of hardware in the city.

Mr. VanDussen has on hand many useful articles which should be in every home. Among them are the celebrated G.R.S. electric clothes washer. Every one knows that the housekeeper would be pleased with one of these. If the man of the family had to do the washing, he would go to extremes to ease wash day. This make of washer is known for its lasting qualities and for its reasonable price. Call and see the splendid display and have one demonstrated. Mr. VanDussen also has a complete line of electric irons, and also electric heaters. Save coal and use an electric heater at half the price.

There are also Air rifles, Roller Skates, Pocket knives, in fact many things to delight the heart of a child.

The line of Vacuum bottles and lunch boxes for the motorist is splendid, if you are the owner of a car. Split Peas and novelty luncheon of Body Has. They are the products of America's finest batters without one of these kits. Visit this and most of them were actually made to sell for much more than the price they offer them at.

Find Bones of Miocene Mammal in California

Eakersfield, Cal.—What are believed to be the most complete portions ever discovered of a squalodont, a mammal that existed in the Miocene age from one-half million to two million years ago, have been found by Charles Morrice, a student of prehistoric life, on Shark Tooth mountain, near the Kern river oil fields. Reconstruction of the squalodont, Morrice said, has been made in Germany, Australia and England from much less portions of the animal than he has found.

Handshaking Old Idea

Even Homer, Aristophanes and Virgil mentioned the social custom of shaking hands. English-speaking nations took it up vigorously apparently as none are more adept in that custom than British and Americans. Many others, like the French and Italians, have variations in their form of greeting which the English-speaking countries do not. At the confirmation of a bargain it appears in II Kings 10:15. It is nevertheless practically relegated to the Anglo-Saxon races today.

Dogs in Warfare

Egyptian paintings of 3,000 years ago depict the greyhound as not dissimilar to the breed of later years. The mosaics and sculptures of the Greeks and Romans show the dogs of antiquity to have been noble-looking animals. That they were also fierce would appear probable from a mosaic unearthed in ancient Pompeii, which shows a snarling watch dog in spiked collar, fastened with a chain. On the block of pavement appeared the familiar words "Cave canem." The Gauls made use of trained dogs in war. So did the Spaniards, in their early encounters with the Indians of the Americas.

NO Immediate Danger of Sun Becoming Old

The age of the sun has been fixed at something between 2,000,000,000 and 3,000,000,000 years. Prof. Walter Nernst, after researches, announced at a meeting in Berlin, says the Detroit News. The estimates are based in part on the rate of decomposition of radioactive elements and in part on deductions from Einstein's theory of relativity concerning the relation between mass and energy.

Early estimates set the age of the sun as low as 10,000,000 years, but geologists showed this was too short to allow for the erosion and other changes observed in the crust of the earth since it became solid. The radioactive decomposition of uranium to lead is a more accurate cosmic clock, and this indicates that the solid crust of the earth has existed for at least one and one-half billion years. According to Nernst the sun, while getting past middle age, is still good for 400,000,000 years, after which a crust will form on its surface and life such as we know it will cease upon the earth.
