Painless Tooth Extractions.
 Have you been having trouble with your teeth? Are you hesitating having something done with them for fear it will cause you pain or some uncomfotableness? Are you wondering what dentist is reliable and which one is reasonable as well? If you are bothered with any of these feelings or thoughts set your mind at rest and make an appointment at your earliest convenience with Dr. C. C. MILNE who was formerly connected with the Taft Dental Rooms. Dr. Milne and his assistants will give you teeth a thorough examination, find out just what is best to do for your particular case, discuss the price and then if you wish will make an appointment with you for a day in the near future. Teeth are all extracted by the use of Nitrous Oxide and Oxygen, this is of course painless and will not injure the health.
 Dr. Milne has had many years experience with the care of the teeth and their disease and the care and prevention of same. Call on him if you are troubled as teeth are often the cause of other and more serious ailments. Telephone Main 503. The office is located on the fifth floor of the Duke Bldg. Clinton Ave South Entrance.

Good Coal and Good Delivery
 It is a blessing to know just where you will be able to get the best coal and the best prices and the best delivery these days when coal is so high and people are making each separate piece of coal do its duty. Mr. Benedict Meisenzahl who deals in wholesale and retail handling of coal and whose office is located at 377 Main street West is prepared at all times to give delivery to your home any kind of coal on short notice.
 No matter what the size of the order the delivery if possible is the same and the same care in selecting the coal is taken with small orders as well as large. The name of Meisenzahl stands for good coal. All kinds of Anthracite are kept on hand, chestnut, pea, stove, egg, and any of them are ready for delivery. The uncertainty of the weather now does not allow the householder to take a chance on the coal bin becoming empty. One should at all times see that the coal bin is sufficiently full to keep the fires of the house going at least two weeks in advance. This will insure a steady supply of coal and no chance of going without fires for a few weeks.
 However the orders left with Mr. Meisenzahl will be delivered as near the date suggested for delivery as possible. Call them at either Main 6883 and they will be glad to take your order.

The Dunham System of Heating
 There is nothing that provides quite the comfort and satisfaction of living that a well heated home, office, apartment, hospital, or any other type of building in which people live, work, or occupy for any purpose of winning a livelihood, especially when the thermometer registers zero and the cold winds blow.
 Heating has advanced with leaps and bounds in the past decade. Many different equipments have been offered for the purpose, but none of them have quite met the success which has been attained by the C. A. Dunham Company in connection with, particularly, the elimination of air from the radiator without the use of valves, the passing of the water (condensed steam) and holding the steam in the radiator by the use of thermostatic type of radiator trap, to be used on return end of radiator or coil, whichever it may be.
 We were the pioneers in producing a radiator trap of this kind, sometimes called vacuum valve, as the first successful one was put into use some twenty years ago.
 "Dunham Heating Service" is the registered trade mark which may be called a light house, that would guide the folks interested in good heating.
 Branch Sales Office No. 15 is located at 629-631 Mercantile Bldg. J. F. Brightman, their manager, would be glad to give further information, bulletins, etc., or talk with you about any problems of steam circulation that may be puzzling to you.

Los Angeles Policeman
Heir to \$500,000 Estate
 Los Angeles, Cal.—Receiving a message inquiring as to the whereabouts of Herbert R. Life Possible on Mercury, Says French Scientist
 Paris.—The planet Mercury may possibly be inhabited, according to Professor Bigouran, the astronomer who saw its passage between the sun and the earth. "The heat and light on Mercury are seven times more intense than on the earth," he said, "but the atmosphere surrounding the planet is so compact that their effects may be less violent. Furthermore, Mercury like the moon, always shows us the same side, and the existence of life upon it is highly possible."
