

THE WEST SIDE NEWS

Published every Thursday by the West Side News Co., 108 Sawyer St.

See advertising space Phone and representative will call. Genesee 4454

Readers are requested to send in notices of coming social activities, news of the west side and items of interest they might wish to have published in "West Side News." Forms close Saturday 6 P. M.

Communism seems to be merely a new method of starving to death. What this country needs is more parking space.

You can't keep gasoline down by stopping on it. Anyway, nobody charges the modern girl with being effeminate.

The reckless driver's life expectancy isn't what he thinks it is. Wheat may have considerable influence in this year's straw vote.

You can tell China is a republic, three great leaders are trying to save her. A tracer has been sent out for the old-fashioned girl who made sheep's eyes.

Girls used to be given such names as Patience and Prudence, but not now, not now! No more of our great men are called anything. They merely split hairs and indistinct.

It seems noteworthy that the most lawless nation is the one having the most laws. We remember when men wore suspenders and people could be hanged for murder.

An elephant's trunk containing 40,000 memories, it must have been padded by a woman. It is not cold enough for women to take off their summer furs and go back to low necks.

Madam's girl doesn't think her hat is as straight as it is tilted to an angle of 10 degrees. The first step in the direction of dissemination has been the gradual elimination of wrist watches.

Madam's girl doesn't think her hat is as straight as it is tilted to an angle of 10 degrees. The first step in the direction of dissemination has been the gradual elimination of wrist watches.

Madam's girl doesn't think her hat is as straight as it is tilted to an angle of 10 degrees. The first step in the direction of dissemination has been the gradual elimination of wrist watches.

Madam's girl doesn't think her hat is as straight as it is tilted to an angle of 10 degrees. The first step in the direction of dissemination has been the gradual elimination of wrist watches.

Now comes the real... Jon-coal!

An apologist says the... nearly anybody can be... The law gives an unla...

It is just as disastrous... If this war in China is to establish the ingredients of chop suey, it is worth while.

It is a good idea to... The honeymoon is over when he announces that either he or his maynais will leave the house.

Well, anyhow, the... Premature cold that stamps out infantile paralysis more than any other damage it may do to crops.

The man with the cheerful smile... The first step in the direction of disarmament has been the gradual elimination of wrist watches.

The furnace stepped right into... One of the lovely things about driving is that one can leave it there.

The modern idea of exercise is to... A lot of Americans have been forced to return from Europe in order to make enough to go back again.

Fashion pages disclose that... If a man wishes to trace his distant relatives, all he need do is to die and leave the money to somebody else.

There are numerous great men, but few that can avoid looking silly when being photographed for the movies.

Modern architects with a mania for built-in contrivances might try for a while with the possibility of built-in heat.

Experts Advise Storage of Cash... America's chewing gum industry started as recently as 1800, which is enlightenment as to why she appears to be trying to make up for lost time.

An optometrist says that fifty out of every 100 persons have defective vision. That probably explains a lot of political preferences.

Soon they will have to add two more wheels to an auto in order to give the speeders more brakes. Four-wheel brakes don't always stop them in time.

Over here every boy has a chance of growing up to be President, while in Russia he faces a better one of being nominated for a firing squad.

Excavators have found highly embroidered fabrics in what is reputed to have been Nero's bathroom. Obviously the ancient gawk-towel.

"How old is a bachelor?" asks the Boston Herald, discussing a proposed bachelor tax. Old enough to be ashamed of himself, but seldom that way.

There is a further sign that toning in the future is to be done in the air. They are sending buildings up to a point where they will provide the de-tours.

Ramos persists that long (fresses) are coming back. But, alas; Rome was not built in a day, and hair that was snipped off in a jiffy cannot be grown in a night.

Who, asks the Milwaukee Journal, remembers when dad wore a stovepipe hat? For that matter, who among apartment dwellers remembers a stovepipe?

It is announced that 1,500,000,000 matches are used every year in this country. In every office there is a pest who invariably has the 100,000,000 in his pocket.

Those traveling syndicates who are swimming pools and tennis courts on their Atlantic liners probably will be disappointed in the ocean-crossing rigibles for some time to come.

In about 400,000,000 years a star will have formed on the surface of the earth's crust, and the light will disappear. By that time the human race will have embraced Beteignese.

A New York court ruled that another must not attend public affairs if she has neglected her hair to do it. But have the poor so father to care for their occasions?

Statement that baldness is caused by deficiencies of the thyroid gland suggests that as much responsibility is being put on the thyroid gland as on the guinea pig.

PROFESSOR FINALLY GRASPED SITUATION

Doctor Bledsoe, assistant secretary of war of the Southern Confederacy, was a profound mathematical scholar and wrote a book on the higher mathematics which, it is said, only he and Professor Pierce of Harvard could understand.

"One morning, crossing the campus, he met Mr. Julian Ingle and, greeting him cordially, said: 'How is your brother, Edward?'"

"Very well, thank you, doctor, only Edward is not my brother but my cousin."

"Oh, yes, to be sure," said the doctor. "Is your son and Osborne Ingle who are brothers?"

"No, doctor, Osborne and I are cousins, also." "Oh, yes," continued the doctor. "How stupid of me! It is Osborne and Edward who are brothers."

"No, doctor, you are mistaken again. They are cousins also." "Doctor Bledsoe looked up at with an inspiration. 'Ah, yes, he said, I have it now. It is an equilateral triangle.'" - The Argonaut.

Fifty Years Has Seen Big Population Shift

Fifty years ago France, with 35,000,000 people, was the most populous country in Europe. Germany came next with 37,000,000, and Britain third with 30,000,000, while the United States had a population 20,000,000 less than France.

A great change has taken place since, observes London Tit-Bits, and from being first France is now last in point of population. Her present population is only a million in excess of what it was 50 years ago, while Germany's 37,000,000 have become 44,000,000, the United Kingdom's 30,000,000 have become 40,000,000 and the United States' 36,000,000 have actually become 110,000,000.

Since 1800 America has multiplied its population by 22, and since 1850—that is to say in 14 years—she has multiplied her population by 32. The population of the whole world is estimated to amount to some 1,300,000,000, of whom 500,000,000 dwell in Europe, 100,000,000 in Asia, 200,000,000 in North America, and only some 100,000,000 in Australasia, a term which is meant to include the Pacific Isles.

Sparrow Air Champion

Even the slowly sparrow will can easily be drilled 21-3. If the record of a Belgian farmer can be trusted, he was able to train a sparrow to fly a distance of 100 miles in 14 hours, 14 minutes, and 14 seconds. The bird was named 'Sparrow' and was trained by the farmer's son, who is now a pilot.

Sharp Report Weather

Weather reports are received at Washington from vessels of more than 20 nationalities scattered all over the world. These vessels serve as floating observatories and it is from their reports that the weather and climate of the oceans are determined. Many of them now transmit their observations by radio. In addition to the routine data included in the reports there are recorded many unusual occurrences and items of interest which have come to the attention of observers.

Job for the Dentist

A Scotchman while in London bought a piano which he ordered shipped to his home. On his arrival in Scotland a week later he inquired of his man Donald whether the instrument had arrived safely and been installed without accident.

Ants Eat Farm House

State entomologists of Illinois are investigating the destruction by white ants of a two-story farm house at Morris, Ill. In removing structure it was discovered the ants had completely honeycombed the woodwork of the structure, starting at the foundation and going to the roof. This often happens in tropical countries.

Indians Used This

One of the first of the wild lobellias is the great blue lobelia, said to have been used by the American Indians in treatment of disease, according to Nature Magazine. This species is found throughout the area east of the Mississippi river and, like its more handsome relative the cardinal flower, prefers a wet habitat.

Too Much Sound

First Hospital Patient—Ben, what do you mean by waking me up at 5:30 sound sleep? Second Dillo—Because, old chap, it was such a distressing sound—Stray stories.

The Busy Flagman

Railway Gatekeeper (to motorist)—Keep back there till the train passes. Don't get no time to weep 'n' up 'n' miss 'n.—From Life.

BELLOWS & HOWDEN

Watchmakers and Jewelers. All kinds of watch, clock and jewelry repairing. 195 Genesee Street. 4 Stores South of Bronson Ave.

W. G. CRANDALL

Coal. Light Hauling and Cutting. Prompt Deliveries and Satisfied Customers Our Guarantee. 937 Genesee Street. Phone Genesee 1400.

Advertisement for eye care featuring an illustration of glasses with 'Shellex' and 'Shur-on' lenses. Text: 'Better EYES Mean — Better HEALTH! You Can Afford To Have Your Eyes Fitted Here. No High Rents. Phone Genesee 2729 For Appointment. L. L. STONE OPTOMETRIST. 890 West Main Street—Opp. St. Mary's Hospital.'

Excavations at Kish

Show Man's Progress. Discovery of the stylus, the oldest known writing instrument, in excavations at Kish, the world's most ancient 'mystery city,' has solved the riddle of how cuneiform script was written. It was stated by D. C. Davies, Director of the Field Museum, at Chicago.

Mr. Davies stated that records of man's progress dating back 6,500 years had been excavated at Kish. He declared indisputable evidence that the Sumerians gave the art of writing to the world.

These people, Mr. Davies explained, existed before the Sumerians of Babylonia arose, and in the same country as that occupied by the Babylonians at a later day. Kish, their capital, was nine miles from Babylon on the banks of an old channel of the Euphrates. It was a vast metropolis, with a civilization older than Egypt's.

China Discovers Yeast

Insistent calls of Chinese housewives for fresh bread, has led to the recent establishment of a modern compressed yeast plant near Shanghai, capable of producing 5,000 pounds of yeast daily. The tendency of the Chinese to turn more and more from their traditional rice habit has become noticeable in recent years with the starting up of flour mills throughout the republic and the increased imports of flour.

Propaganda

The noun propaganda and the verb propagate are derived from the same Latin root and are related in meaning. They are derived from the Latin verb propagare, pro, forward, and pangere, to fasten. One meaning of propaganda, and the common one, is the art, practice, or system of propagating, or spreading or extending the tenets or principles of a certain religious, economic or political doctrine. The one who propagates such doctrine, particularly with zeal, is called a propagandist.

Her Optimism

The talk had turned to psychology. This disturbing question had just been put: "When does old age really begin?" To establish a formula was proving rather difficult, when a woman, who did not look her years, found the following: "To me, old age is always fifteen years older than I am."—Cyrano (Paris).

Nothing to Do but Fish

Herring fishermen of the coast of Scotland have nothing to do but fish since the recent inauguration of a service that sends a vessel to their boats, buys their catch and takes it to port for resale.

Dollar a Mile

If a driver is caught speeding through Middletown, Conn., he may expect to pay a dollar a mile for every mile he has been going. A recent offender charged with going 40 miles an hour, paid \$40.

Up in the Air

"Doris, where is your husband?" "Gone out with a bunch of aviators skyarking."—Louisville Courier-Journal.

TWO SURVIVORS OF PREHISTORIC TIMES

The lamprey is a jawless, limbless, scaleless fish. It is one of the survivors of prehistoric creatures. The first fish on earth—parrot fish, the sea-sword jawless, and the lamprey is one of the few jawless fish left. Whenever a fish that doesn't like the lamprey yells "I'll bang you on the jaw!" the lamprey laughs, but that doesn't prevent the angry fish from punching him on the nose—for the lamprey has a nose.

Another prehistoric creature that still exists is the tuatara of New Zealand. It dates back thousands of thousands of years. The tuatara's body resembles the crocodile's. It has a huge, frog-like head. The tuatara's eggs take longer to hatch than those of any other living creature—over a year.

The lady tuatara carefully watches over the eggs all the time, taking time off only to go for an occasional stroll. New Zealanders admit that the tuatara has patience. But they wonder if it's worth all that bother for the tuatara. It's a stupid creature and not particularly well liked—Fame and Firelight.

PUT ON RECORD AS GLUTTONS FOR FOOD

What is the biggest meal ever eaten by one person? asked London Tit-Bits. In the transactions of the Royal Society, a man in his 70s ate a 700-pound old boy who ate 375 pounds of food in six days; while another, suffering from acute hunger, consumed 334 pounds of food in the same period, and when refused further supplies started to gnaw his own flesh!

In the same publication a doctor records seeing a Norfolk farm laborer eat a whole leg of mutton at one sitting. A woman patient at St. Bartholomew's hospital ate three quarters loaves, three pounds of meat and several pounds of potatoes every day for three weeks.

As for drink, the case is recorded, of a child aged three who drank two pails of water daily and seemed none the worse. Glass blowers have been known to drink 40 pints of water a day, while a French physician had a patient who habitually drank 50 pints of red wine a day.

Sound Is Made Visible

One of the most efficient instruments for making sound visible has been perfected in the Low-Higer audiometer. All sound consists of waves of the atmosphere. The instrument catches these waves in a horn, eliminating resonance and at the bottom, of this horn is a diaphragm of celluloid to which is attached a highly polished piece of platinum. Built into the instrument is an electric light and lenses and a drum which carries a strip of photographic film. When the sound wave enters the horn it makes the diaphragm vibrate, the light reflected bobbles and as the photographic drum rotates the wave form is recorded.

A husband has been enjoined by a court from saying more than three cross words to his wife in a day. It is suggested that they better had not try to work out the puzzle together.

Dempsey and Sergt. Samuel Woodfill have been photographed together at Atlantic City. A more interesting picture would have been one of the same pair shoulder to shoulder in the Argonne.

An expedition to British Honduras has brought back a pair of strange animals that crawl along the ground like alligators, have the armor of turtles, and can spring six feet. It sounds as though the perfect pedestrian has been discovered at last.

A New York judge has ruled that a mother must refrain from attending a political meeting if such attendance interferes with the care of her children. It won't. She will leave them with father.
