Always Ready To Move You

The George M. Clancy Carting Company who have so successfully served Rochester's moving wants for a number of years are always ready to move you and your household effects. The office of the company is at 3 Grand Avenue and you may always reach them by calling Stone 719.

The art of moving is an art of sorts, and it takes years to acquire the finish to that work as well as it does along other lines. The men employed by the Clancy Co. are all experienced time-taught men who take pleasure in doing the best possible work in this line of business.

The packing end of the business is one of the hardest and most difficult ones. The company however is noted for its safe moving, as none of the dishes, fine furniture, pictures or other delicate things are ever broken when entrusted to them for moving.

This spring when it comes time to move to the lake or to a cooler or more advantageous part of town, call on this company and see for yourself the pleasing manner in which they move and also witness the low and reasonable prices they ask.

Have You Tried This Shop Out For Your Choice Cuts of Meats?

You can procure the best cuts of meats at the Andrew's Market at 73 Front street just off Main street east. Why not drop in there and inspect the fine line of meats Mr. Andrews carries? Why not order one of their home cured Hams for dinner, they are delicious and can be used so handily for the second meal as cold meat, and for lunches too. These hams are selected from young, tender, corn-fed pigs and they have that lovely mild flavor because they prepare them by their old-fashioned Sugar-Cure.

They also carry all other fresh meats at all times and will be glad to receive your order for meat at any time. Examination will convince you that their meats are of the finest in the city and are prepared in one of the most sanitary and up-to-date markets in Rochester. They also carry poultry and all kinds of game in season. They are anxious to prove to you that they sell only the best. If this sounds like exaggeration give them a chance to prove it by giving them an order.

Call Main 2563 and order your meat or chicken for your special dinner on Sunday, and we feel sure it will be as nice as you have ever eaten.

Spring Flowers At Reasonable Prices

The Seneca Florist Shop located in the Seneca Arcade has a wealth of lovely flowers at all times. They carry the usual roses, lilies, orchids, etc. but just now the shop is beautiful with spring flowers. There are daffodils, which are always pretty and one of the first spring flowers. Now, when there is so much snow about these little yellow flowers are especially bright to send to those shut in doors and to the sick. There are too, narcissus, in both white and yellow, these are lovely for their scent and lasting qualities. The yellow and pink and red tulip of the Darwin variety can be had in pots which will grace any table or enliven any dull spot in the home.

There are many other flowers marigolds among them. If you are a person who is especially fond of giving flowers or in having them about you in your home, try purchasing them at this little shop. You will find especially courteous service and the best for your money.

Selecting Floors For Your Home

Hardwoods are never used for outside work because when they are subjected to dampness they warp and swell so badly that the floor may be ruined. Certain hard woods like Maple are especially subject to change under conditions of dampness. When this material is laid for flooring care must be taken to allow for subsequent expansion but it makes a fine floor when properly laid.

One of the first principles of laying a floor is to get it tight. With oak flooring nails should be set—that is driven far into the wood by means of a steel tool. The purpose of this is to bring the wood sections close together.

Subsequently the dry air of your apartment may dry your flooring and make it shrink. This may open the joints to a slight extent. Modern methods of flooring manufacture have developed a very superior product. Mr. Leonard Smith is an expert at the flooring business, and can give you much more information at first hand. Call him at once if you wish expert advice.

YOUNG HELPERS HAD EYE FOR BUSINESS

Mr. Jones was cutting his front lawn. Three children in the neighborhood drifted across the street and the first thing Jones knew they had his bushel basket and were carrying the grass out onto the vacant lot next door. Jones figured that if the kids were enjoying themselves it didn't matter so much, even if they were getting in his way and slowing up the grass cutting considerably.

After finishing the front yard Jones moved to the backyard. Meantime the children had drifted away to their homes for the evening meal. Presently, however, they came trooping back, and started in to gather the grass.

Happening to glance behind him Jones saw three little heads were bent together in earnest conversation. Then the leader of the children walked boldly up to Mr. Jones.

"Mr. Jones," he said, "instead of just saying 'Thank you,' like you always do when we help you cut the grass, why don't you give us something"—Indianapolis News.

Light Mystery Solved

One of the most spectacular forms of lightning (if it can be so called), occurs in the Andes, and has occasionally been reported from other mountainous regions. At times the mountains seem to act as gigantic lightning rods, giving rise to more or less continuous diffused discharges between themselves and the clouds, says Nature Magazine. A few years ago American meteorologists thought they had found an example of this striking phenomenon in North Carolina, but the once mysterious "Brown mountain lights" have been proved to be merely the beams of distant locomotive and automobile headlights or due to other human agencies.

Roman Theater Unearthed

The remains of a Roman theater, 86 feet in diameter, dating from the second century of the Christian era, have been discovered in a garden at Ferentino, about fifty miles south of Rome. A fine background is provided by the range of the Monti Lepini and the valley of the Sacco, along which the railway runs from Rome to Naples. The ancient Ferentinum was a city of the Hernici, taken by the Romans (as Livy tells us) and destroyed in the second Punic war. It afterward became a Roman colony and was selected by Horace as a typical quiet country town where the nerve-fagged Roman could recuperate.—Scientific American.
