Courtesy First Principle In Battery Service

The first thing in the battery business is to know all there is to be known about the care and repair of storage batteries, but they can't for a minute forget that it is not only what they do but the way they do it that counts. They way of the Long Life Battery Company, 28 Prospect Street, Main 8461, is always the courteous way. You may be sure that they will treat you just as you would want to be treated if you were the car owner. Bring your battery in if you want to know what happens when water in the battery runs low—when the charge goes down—when a short circuit occurs, they will tell you. More than that, they will tell you the few simple things you need to know to side-step battery trouble. Their batteries are their own make, and once you have tried them we are sure you will always use them. Batteries are rented, recharged and repaired at the most reasonable prices. You will be surprised how reasonable you will be able to have your battery recharged and repaired. Another important service—one that counts—is their service car which is at your service. Just call Main 8461 when you are in trouble and you will be more than pleased with the quick service you will get.

HAPPY THOUGHTS

When a man finds a woman for whom he thinks there's nothing good enough he asks her to take himself. —
A man's busy day is when he stays at home to rest, and his wife gets him to do a few odd jobs in the house. —
Try being cheerful when your troubles are heaviest, and see how much lighter they become. —
Speaking the truth does not mean telling all one knows. There are many truths that should be buried deep under silence and charity. —
If you have no good reason for doing a thing, don't do it.

NEW INVENTIONS

A heating radiator has been invented that will burn any kind of oil not too heavy to flow. —
Of English invention is a motor-driven wheel to be attached to baby carriages to propel them. —
A portable room heater has been invented that burns oil against a clay backing like those used in gas heaters. —
Novel in the musical instrument line is the violin that can be folded, inclosed in a case and carried like a walking stick. —
Delicate apparatus has been invented to record the operation of controls on airplanes and the response of the planes to them.

PUNGENT PARAGRAPHS

When you do the right thing, you spoil the effect if you brag about it. —
Men are better judged by what they haven't than by what they have. —
Be thankful for failures. They teach you things you badly need to know. —
What an improvement it would be if baldness attacked the chin and not the head! —
Ability works its way to recognition more quickly if liberally mixed with gall. —
Men excel women in some things, but one of them is not pecking through keyholes and transoms. —
Hex Heck says: "If the mustache comes into style agin' the sale of canned soup will get a severe setback. — Bert Moses in Detroit Free Press.

FLASHLIGHTS

The first telescope makers had their troubles, but they never tried to see a chorus through a bobbed head. —
Some ladies are elected president of a civic club, and some don't even know how to place the cutlery. —
Our old-fashioned notion is that there was just as much efficiency before there was so much talk about it. —
There are few good snake stories this year, which shows what happens to a country when its inspiration is gone. —
Very few vice-presidents become presidents. There is a divinity that shapes our ends, rough hew them though we may.
