

# Worthy Firms TO Patronize

## The New RED CROSS FURNOLA

Requires no basement for its installation. Solves the heating problem in four and five-room homes. Installed in any room having a chimney vent, its deep-toned, richly enameled surface blends harmoniously with the many pieces of furniture.

With ample radiating surface, it furnishes warmth and cozy comfort at an economical operating expense. Burning the smaller sizes of coal, its economy is apparent with a National fuel shortage facing us this winter.

Moderately priced at

### PUNGENT PARAGRAPHS

Whatever is worth having is hard to get.

Heroes are men who raised hell at the proper time.

Battery works better on an old maid than on a debutante.

It is more desirable to be talked about than to be laughed at.

Greatness is a mere matter of being met at the depot by a brass band.

The main thing in swimming is courage, and the next essential is water.

Instead of telling what should be done, suppose you pitch in and do it.

Civilization seems intent upon the one idea of increasing the sale of cigarettes.

No boy ever came out of college with brains unless he took some along when he went in.

Politics could be improved if some way was invented to get more money out of being honest.

Bravery is a dangerous thing unless you have good judgment in deciding when it is time to run.

Some widows have a good memory, others a poor one; anyhow, it seems to make no difference in their ability to repeat.

Hex Heck says: "Poets these days don't seem to get so much inspiration out of glinger pop as the ole-timers get out of wine."—Bert Moses in Detroit Free Press.

### STRAWS OF WISDOM

Increased earnings invariably bring increased yearnings.

The nearer you get to some people the smaller they seem.

Those people who possess self-respect are never really poor.

Sweeping assertions generally raise doubts of misunderstanding.

**Effort Makes Success**  
Many people want to do things that are entirely worthy and approvable, but do not know how to accomplish them. They lack the power of making decisions, which is the key to the whole thing. To try, and fail, is better than to have tried at all.—Grit.

### Jenny Lind, Genial Friend

Jenny Lind came again and yet again to the Taylors' congenial homestead; her kindness, "sensitive, capricious and restless as it is, her humanities and impetuosities" won the affections of mother and boy alike, says the Christian Science Monitor. "Great impulses, a humble Christian heart watching and praying to bring her into subjection of God's will, she is a great addition to my life," wrote Alice Taylor. "Nor was it to him (James Spedding) only that the great catastrophe of the world's worship brought her message of beauty and joy. In many a letter of that date we catch glimpses of her shining presence in that quiet home.

### Says Earth Stands Still

An instrument which, the maker says, proves that the modern ideas of the solar system are wrong, has been invented by Chang Chung-Shan, a Chinese astronomer. He says his instrument demonstrates that the earth does not move, but stands still, suspended in air like a soap bubble. He says further, he can prove with it that the sun and other heavenly bodies revolve around the earth. With the aid of two colleagues he has written a book in support of his theory, but it has not yet been translated into a foreign tongue.

### Of Its Own Volition

Two girls were quarrelling and one centered her attack on the shape of the other's nose, which was distinctly of the pug variety. Her remarks proved so telling as to reduce the snub-nosed one to the verge of hysterics. "It's cruel of you to make fun of my nose," she wailed. "I didn't choose it." "Of course you didn't," was the unfeeling retort. "It turned up unasked."

### WEENIE SAYS

My newest fiance calls me methyl, because he says I strike him blind.

If you tell a person the truth, he never believes you—so what's the use?

I'm rooming with my deadliest rival now; it's the only way that I can keep tab on her.

Flattery is originality in paying compliments.

The only way to keep a man is to get all the love that he's got.

I believe that I'd get a kick out of a dance—if I had a chaperon who had never seen one before.

### Really Safe's Contents Were "Over a Million"

Latimer had great difficulty in finding just the right sort of office space that would suit his requirements. Searching about the city from the Battery to Fifty-ninth street he finally discovered what he wanted. This office was one flight up and directly over a bank. The bank owning the building, Latimer was compelled to call on the president of the bank in regard to the rent, lease and other particulars. After these formalities were amicably settled he noticed a large safety vault.

"How much money is there in the vault," he inquired of the president. "About \$1,000,000," was the answer. When Latimer moved into his new office he had his small second-hand safe placed exactly over the spot where the vault below was located.

Soon customers arrived and congratulated him on securing such an excellent location.

An old friend who never had much faith in Latimer's business ability called and, seeing the safe in the middle of the office, asked:

"How much money have you got in that old safe?"

"I don't know exactly," answered Latimer, "but it's over a million, anyway."

And literally it was.

The old man left the office muttering that he could not understand how that shrimp had accumulated so much money.—New York Evening World.

### Here's Unique Plan for Raising Church Funds

At least one society of women in a leading church of the city, perhaps societies in other churches, has decided to raise funds for its church in a way that is novel, if not unique, to say the least. The total amount realized would be well up in the thousands of dollars if figures tell the true story and the women carry through to the end.

One woman invites seven friends to luncheon and explains the plan. Each is to pay 50 cents, and the hostess may pay or not as she pleases; but it is believed if she furnishes the luncheon she would be exempt.

Each of the seven invites six, which would make 42 guests at 50 cents each. Then each of the 42 invites five, making 210; and each of the 210 invites four, making 840.

The number of guests diminishes until the last hostess would have only one to entertain, but there would be more than 5,000 of these parties for one.—Rochester Democrat and Chronicle.

### On With the Story

"You don't seem to have any notorious spots here," said an inquiring tourist to the native guide. "In the last village we stopped at they showed us a place where a man had laid in wait for his rival in love and attacked him with fendish gusto.

The guide had really never heard of this remarkable crime, but his professional jealousy was aroused.

"That is quite true, sir," he unblushingly bore witness, "but you, perhaps, are not aware that the villain afterward made his escape in this direction, and you are now standing on the very spot where he threw away the fendish gusto with which he made the fearful attack."—Edinburgh Scotsman.

### Mole Not Solely a Pest

The worker in velvet who raises havoc in the garden plot is not an unqualified nuisance. The mole has a voracious appetite and some gardeners think he consumes enough worms and grubs to make up for the damage he does. Although it has no perceptible anal appendages, it hears sounds which humans could never pick up. A peculiarity of the mole is that its fur has no "set" or slant, that is, it does not become disordered no matter in which direction the mole works. Consequently a moleskin is spotlessly clean even under the most trying circumstances.

### Clock Has Only One Hand

An ingenious clock with but one hand is installed in an office in Portland, Ore. An English naval officer, who was wrecked, is credited with the invention. After being shipwrecked and thrown on a desert island, he found that among the few effects he had saved was a watch with the minute hand gone. Necessity of telling time with only the hour hand inspired the officer to divide the dial into spaces indicating one-minute intervals and from this rough pattern a marine clock was fashioned that serves its purpose as well as the old type with two hands.

### Flat Feet and Rheumatism

Many persons think they have rheumatism of the legs or back when they have flat feet or broken arches, according to Dr. Solomon Strouse in Hygeia Magazine.

A young man fell as he was escorting his lady down the aisle of a theater. Much embarrassed and fearing himself a victim of serious rheumatism, he stayed in bed nursing his illness. When he finally called on a physician, his flat feet were discovered and his illness disappeared in a pair of properly adjusted shoes.

### Early Settlers' Hard Time With Toothache

An interesting and instructive history could be written on the care of the teeth. We have plenty of tomes which deal with battles, treaties, kings and presidents. But the history of dentistry is not so well known. There is no denying that the record of Lewis and Clark makes entertaining reading, but we should like to know some day how Daniel Boone, or, to come closer home, how pioneers in the Chemung valley wrestled with wicked molars.

The early settler, or for that matter, our forefathers who may have lived in settled European communities, were indeed unfortunate if their teeth bothered them. The science of dentistry is new. Great-grandfather, who suffered from diseased molars, kept alive if his resistance was strong, otherwise, he died from one of a score of diseases now attributed to local infections. Faith in "the good old days" has no foundation in fact. The average age of Americans approximates fifty-five years. In the days of King John, it was less than twenty years. The difference represents the advancement of science.—Elinora Advertiser.

### Machine Sets Forth Cold Facts of Life

A machine for showing the relation of one set of facts to another set of facts has been invented by a Princeton university student. Although the machine has fewer parts than the simplest typewriter, its capabilities are tremendous. To illustrate. It will tell a man how long he may expect to live. The factors used in this determination, according to report, are the quantity of tobacco smoked daily, the average duration of sickness a year, and the average blood pressure.

Measuring mortality is an important part of the insurance business, and the new machine might serve as a useful check on the expectancy tables set up by credit actuaries. But probably the machine won't displace the logarithmic gentlemen who quote the odds on the so-called human race. Handbooks still flourish by the side (approximately) of new-fangled betting machines and it does seem a little more neighborly to get a run for your money from a man than from a mechanism.—Nation's Business Magazine.

### Dressing the Part

There's a story that has to do with a stage manager who was rehearsing a mob scene for a new play. After he had directed the men who had been selected for the scene he told them to report at the theater that evening, adding:

"This scene we've rehearsed takes place in Russia, and I want all you guys in fur overcoats."

"But I haven't got a fur overcoat," protested one of the poor actors.

"That's none of my business," replied the stage manager. "If you're not dressed for Russia I won't let you go on."

The extra arrived at the theater that night—but without a fur coat.

"Didn't I tell you I wouldn't let you go on unless you were dressed for Russia?" said the manager.

"But I've got on two suits of underwear," protested the poor actor.

### Arrows Used by Aztecs

The Smithsonian institution says that the South American curare (and other native names) poison for arrows concocted from strychnos nuxvomica did not extend to Mexico. What is little reliable information on this point, if any, was used by the Aztecs and other Mexicans on arrows. One reference says that arrows were dipped in the acrid juice of leaf of an agave, but the species is not given. The Aztecs were adepts in the properties of plants, and aside from the wound, could have made an arrow very disagreeable.

### Fresh Home Meats

Fresh meat, together with fresh dairy products is the one important item in the menu of the average household. Meat should always be purchased under the sanitary conditions and of reliable people.

These two necessities are obtainable at the Andrews Market at 73 Front Street. Not only that, but it is handy to down town shoppers, and they can select their cuts of meat themselves. Many housewives prefer to do this rather than to order over the telephone. However, if you wish, your orders will be received, and the best attention given them at this store.

Why not drop in there and inspect the fine line of meats Mr. Andrews carries? Why not order one of their home-cured Hams for dinner, they are delicious and can be used so handily the second meal as cold meat, and for lunches too. These hams are selected from young, tender, corn-fed pigs, and they have that lovely mild flavor because they prepare them by their old-fashioned Sugar-Cure.

Call Main 2568 and order your meat or chicken for your special dinner on Sunday, and we feel sure it will be as nice as you have ever eaten.

**HEWITT TIRES**  
Cord and Balloon Tires  
**32 NORTH UNION STREET**  
**COLEMAN TIRE COMPANY**

**An Up-To-Date Hardware Store**  
One of Rochester's best known hardware men conducts a very up-to-date and complete store at the corner of North and Lyndhurst Streets. Many are familiar with his name, Martin Van Dusen, better known as Van Just at this time of the year, the fall stock is arriving and those who wish any hardware, whether it is inside ware or outside will find a lovely new assortment here at the right prices.

People who have been building this summer and are now completing their homes and need the right and newest thing in inside hardware will find Mr. "Van" an authority on the subject, and one who will be only too glad to furnish you with the information. Fixtures can be obtained in nickel or brass in different finish.

These days when it is too warm for a fire in the furnace, but when you really need a little heat, the electric heater is a blessing. Some very nice ones can be had at very low prices, and a fine line is on display at his store.

There is too the general line of hardware always needed by builders, contractors and architects, and also by the home owner. Call at this store when in need of any of this line.

**Fred's Gas And Tire Service Station**  
A place that is mighty busy these days selling both gas and tires is the popular station of Fred's, Platt Street near St. Paul. Fred's Gas and Tire Service Station is very popular with Rochesterians because of the prompt and courteous service rendered to all, and the high quality of goods carried.

"It pleases Fred to please you"—that is his motto, and a motto that he uses every day. If you want the best Corduroy balloon tire, with the sidewall protection, stop in at Fred's Station, and you will get the tires that you are looking for.

Corduroy balloons embody in the highest degree two of the most important fundamentals necessary to proper balloon performance.

Flexibility—the protected Corduroy design, consisting of a continuation and enlargement of the regular SIDEWALL PROTECTION rib feature—carried in every increasing sizes to a master rib at the center of the tread—PERMITS the use of a much heavier TREAD AND SIDEWALL on CORDUROY Balloons and at the same time makes possible the greatest Flexibility known to Balloon construction.

Easy Steering—The rounded edges of the ribs make CORDUROY Balloons the easiest steering Balloon tire on the market. The so-called rubber-tail construction does away with shimmying and makes it very easy to hold the road. CORDUROY Balloon tires are designed for Maximum Riding Comfort.

The life of the automobile is easily doubled and driving comfort quadrupled. Call Fred on the phone at Main 5882 and he will be glad to give you a quotation on the particular tire that you want, and you can be sure of complete satisfaction.

**Cured At Lourdes**  
**She Enters Convent**  
Nantes, Sept. 28.—"La Croix Nantaise", local Catholic paper, announces that Mademoiselle Raymond Margerie, beneficiary of a miraculous cure at Lourdes, is to enter the convent to consecrate her whole life to gratitude to the Blessed Virgin.

Mademoiselle Margerie, who is 23 years of age, has suffered from tubercular affections. A surgical operation had been performed but had not effected a complete cure. Several physicians testified officially at Lourdes that the trouble has now entirely disappeared.
