Lace Is Popular for Summer Wear

All Kinds and All Colors of Frilly Material Are on Fashion Card.

Lace is everywhere—all kinds of ace white and cream, black and colors, coarse and fine, silk and linen and metal, lace of fine mesh net with heavy figures. Those who can have real laces have it. Those who cannot have real laces have some other kind; nebody cares so it's lace.

Frills are developed very much from ace: frills such as we have always known, but there are, surprisingly, other developments with it that we would scarcely have thought of in the last lace era. Two-piece jumper frocks, for instance. And then there are lace frocks made in tiers-plain, not gathered tiers. And then the frock we have had sometimes with the very pretty flare composed of net and lace or chiffon and lace, or just lace. This model is threatened with the general edict of discontinuing the flare. But the threat doesn't scare women very much, at least where the fluffy dresses of filmy materials for the summer are

The charming circular flounce with the all-over to match it is likely to prove irresistible for this season and all through the summer as much as summer usually is of a brilliant shade. it has done through the early spring. The model shown here is of sed eatin It almost solves the problem for the and it is handsomely embroidered in home dressmaker, since from it is silver. To be in the back, give it a distinctive appearthe best of taste this lace is on the ance. Spanish weave, but must be a rather fine pattern with a mesh not too coarse and rather small pattern.

The mesh is coarse enough to show whether one has just under it a slip of net or chiffon. And while flesh chiffon has been used a great while as a foundation for lace frocks, some persons prefer the flesh or deep cream net. It is just a little more sheer and if the mesh of the lace is wide enough the net doesn't lessen its effect,

Cream and ecru net frocks are often made with boleros and then tied with the toreador or gypsy sash; the coreador tied at the side and the gypsy in front. The bolero, giving a youthful line always, is chosen frequently for the young girl's frock.

One of the season's touches on lace better with the woman of quite profrocks is of metal ribbon. Sometimes it is used as an entre deux with insertions or to join two kinds of lace. One very new cream lace two-piece frock employed an imitation of the old the effect of golden hair.
