What Use Are Clocks That Strike at Night?

To all those who are victims of insomnia, the distress caused by the atriking and chiming of clocks (and especially those which occur every quarter of an hour) is well-nigh unbearable and is calculated to postpone indefinitely the chance of recovery, a writer in the Kansas City Star asserts. The vicar of a large church known to me, which has a loud chiming clock, the chimes occurring every quarter of an hour, has been recently obliged, in deference to the strongly expressed wishes of those having the misfortune to live in the vicinity, to have the chimes entirely taken of during the night hours. What is the use, or the supposed use, of a striking clock at might? I fail to see one single use for it. It ought to be as obsolete as the old watchman of bygone days, whose duty it was to call out each hour and the state of the weather. Those clocks having mechanism controlling the striking movements which is not capable of being switched off for the night hours should have their striking mechanism "scrapped."

Old Thatched House Great Writer's Home

In Grovelane, Camberwell, is a 300year-old cottage that is reputed to be the only thatched dwelling house remaining intact within the metropolitan area of London.

In the seventies of the last century it was the home of William Black. Here he wrote "Madcap Violet," and here he was visited by George Gissing. who was so delighted with the locality that he afterwards made Grovelane the residence of Nancy Lord in his novel, "In the Year of Jubilee."

At this period entomologists came there in search of stray specimens of "Camberwell Beauty," now amongst the rarest of British butterflies, but which once bred so altogether too plentifully bereabouts that the local authorities were wont to pay sixpence a bushel for the dead cater-
