

Which Description fits you?

Ten years ago this young married couple had a good position—earned a fair income. Year after year he received an increase in salary and was able to provide wife and children many advantages. But the more he made the more he spent. He invested some money in stocks, but the stocks moved slowly, also, so that he and others some of whom died. "Never mind," he would always say, "I'll get a lucky break one day and then I'll be able to live on Easy Street the rest of my life." Now, after ten years, he has made no real progress. He is still drifting around, making a little here, losing a little there, and still waiting for some good break to provide protection for his family in the future and take care of his old age.

...the more he made the more he spent. He invested some money in stocks, but the stocks moved slowly, also, so that he and others some of whom died. "Never mind," he would always say, "I'll get a lucky break one day and then I'll be able to live on Easy Street the rest of my life." Now, after ten years, he has made no real progress. He is still drifting around, making a little here, losing a little there, and still waiting for some good break to provide protection for his family in the future and take care of his old age.

"Today you are in some mood." Don't know when you will pass. The St. Ignace Method is a simple one to follow, an easily done and sure to benefit you and your family. For all practical purposes, it is a sure thing. St. Ignace Method is a sure thing.
