Planning a Trip To the Holy Land

By J. NORMAN BURKE

What could be more splendid than to plan at this time a spiritual pilgrimage to Jerusalem and Bethlehem this coming Christmas time. The Holy Land; David and Abraham and Ruth; the Christ Child in the manger; the Wise Men and the Magi; the miracle of such names as these has brought long centuries of pilgrims struggling half way across the world to stand where we now stand so easily.

What would be more fitting on this day than to travel that road which keeps to that route by which the wise men left Herod, following the star. It passes the field of Boaz, Rachel's Tomb, a place where David slew Goliath; and the greatest of all, to hear Mass and burn a candle where Christ was born.

The Union Trust Travel Service, 30 East Avenue, Rochester, N. Y., has served many Rochesterians in planning tours for the Holy Land, and they will be pleased to outline your trip, embracing some of the Holy Land's most beautiful and historic scenes.

Red Cross to Hold Roll Call Nov. 11-29

Washington, May 29.—The Thirtieth Roll Call of the American Red Cross will begin on Armistice Day, November 11, 1929, and continue until Thanksgiving, November 28.

Early announcement of the roll call was made so that organizations planning to hold campaigns in the fall might pick dates which would not conflict.

On Rearing Children from CRIB to COLLEGE

There is no period in the entire life history of an individual that is so full of potential possibilities as the period under five years of age. Here we have the time of most rapid development both mental and physical, the time when habits do not have to be changed before new ones can be learned, the time when the child is more definitely affected by his environment than he will ever be again. It is the age of plasticity, the age when we have in our hands the most malleable of material, the age of eager wondering and brilliant belief. A clean slate. May the writing we trace upon it be worthy!

An important part of dental hygiene is the use of the tooth brush. Tooth brushes, unless kept, are none too sanitary. Cleanliness is a necessary step to preventive work. A tooth brush should be washed in hot water after each using, dried and hung in the sun. It should be periodically washed at all times to see that it is as clean as the tooth it brushes.

The power of selecting clothes which one will enjoy doesn't come except through exercise of choice and development of taste. It is a result of learning how in the years when one learns how to do everything. Anything which we do well, the psychologists tell us, we must start in early years. All of us know women who go through agonies of indecision whenever they buy anything to wear. They are the bane of department stores and the next morning what they have bought. This lack of the power of decision comes out of a sense of inferiority just as much when it applies to dress as when it applies to the more serious affairs. One can begin to learn to give a girl confidence in her own judgment so that she may make decisions that satisfy her when she is grown.

Whenever a house is being looked over for safety's sake, the stairs come to the foreground for consideration. They need to be well lighted, as do all other parts of the home. A switch at the head and foot of the stairways is an excellent investment. Children can be taught when quite young to use the light fixtures. Fire buttons which control the lights should be placed low enough for children to reach. With the basement steps another precaution may be taken. They may be painted a light color, so that the steps may stand out and can be seen easily during the twilight hours and on cloudy days. Light gray paint is a happy choice, as it does not show soil readily.

All children's parties should be as simple as possible, as to food, favors and entertainment, and should be so short that the children depart before the period of unruly behavior, almost certain to follow excitement, sets in. A dish of ice cream and a clean frock should make a party up to the age of twelve or thirteen, at least, and these parties should never be expensive or elaborate or large.

There cannot be any set formula for child care. As a working method we suggest prevention rather than cure. A better understanding of our children's needs and temperaments will dissipate many of the hazards of temperamental faults and failings. But from my own experience with modern parents and their children I would like to emphasize the fact that a little judicious neglect is often far better than worried overattention.
