Lure of Football Covers the Land

Rochester University kept its wagon hitched to the winning star as the football team won its first Saturday, beating its opponent, 27 to 0.

The Nassers defeated Lackawanna at Edgemoor Park before a crowd of 3,500, the score of 20 to 0, on Sunday afternoon. At the same time the Oxford were beating the Niagara Falls Rangers at Niagara Falls, by the score of 21 to 0. Both local teams played a fine brand of football.

The Catholic Colleges

Rochester's Notre Dame warriors made their debut for the season, defeating the strong Indiana team, 14 to 0. Favorite expected a better score than that, but a substitute player lost his head and the ball at the same time when he was at the threshold of the Indiana goal. Then, the Knute used a flock of substitutes in the last quarter. It may be that the good boy didn't want to show the full strength of his team in this game. He thinks are predicted for the team this year.

Niagara University played a banking game against Cornell. It lost, 22 to 6, but it made the lacrosse play more minute of the time, and showed, except for fumbles, the makings of a mighty line team.

Western Maryland sprung a big surprise by beating Georgetown, 7 to 0. It not only beat Georgetown, but outplayed it every minute of the game.

Purdum smothered St. Bonaventure, 33 to 0, although in parts of the game the Saints showed real class and held the big football team in a wonderful way.

Canisius lost to Geneva, 7 to 19. Holy Cross beat Providence, 11 to 6, and Manhattan ran away with George Washington, 27 to 7. St. Mary's defeated Duquesne, 18 to 0.

"Chief" Mehan led his N. Y. U. team through the ranks of the West Virginia Wesleyans to the tune of 25 to 0.

Yale made the high score of this day, trouncing Vermont, 59 to 0.

Great throngs witnessed the games everywhere, and they enjoyed the beautiful sunlight on this ideal day.

Weather-vane Adds Interest to Chimney

In olden times the weather-vane above a man's home was apt to designate his occupation. The fisherman would show a dolphin, the sailor a sailboat, the hunter a bow and arrow. But now that knowledge of wind and weather are scientifically given by newspaper and radio, weather-vanes are less serious things, and usually point out the householder's avocation... his favorite pastime.

So the golfer chooses to put a miniature silhouette of himself above his house; the painter places a palette and brushes; the aviator may choose an airplane.

Dutch Colonial Type Will Appeal to All Prospective Home Builders

Wide dormers give the Dutch colonial air to this frame home which is 24 feet wide and 30 feet deep. The living room and dining room are both large. It contains six rooms and bath besides an entrance and breakfast nook.

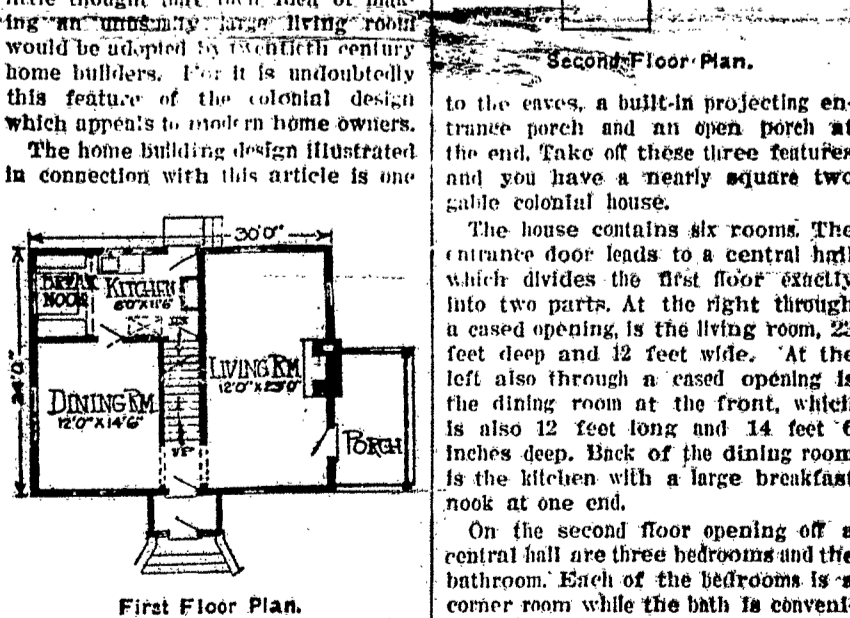

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 407 South Dearborn Street, Chicago, Ill., and only include two-cent stamp for reply.

Styles in homes run in cycles. Little did the designers of what we know as the colonial home realize that they were setting a style that would be most popular with home builders three hundred years later and would meet the needs of an age when building costs would be such as to make it important that all the space in the house be utilized.

Also the designers of colonial homes little thought that their idea of making an "unnecessarily large living room" would be adopted by twentieth century home builders. For it is undoubtedly this feature of the colonial design which appeals to modern home owners.

The home building design illustrated in connection with this article is one

that will appeal to all prospective home builders who want an attractive roomy house at the lowest possible cost. For it is well known among professional builders that a home either square or rectangular, the outside walls of which are without jogs or projections, is the most economical to build.
