The little girls had been ordered to make their bed and straighten up at a luncheon at the Rochester Club, their dressers before going out to coast. Most of them had obeyed that order rapidly, but thoroughly, As Sister and Anita entered the dormitory, "Humpty Dumpty" Clark, one of the "clover" and so-called because she wa very fat, was engaged Catholic Churches dresser, so her corner in the dormi in polishing the brass knobs on her tory would look spick and span. Sister Gertrude surveyed the polishing act with interest. "That's very pretty, dar, but the pitcher is not dean, nor is the drawer in good order. By this time poor Dumpty was in lears and indignantly declaring that there was not a single bone in her sitcher, nor snakes, nor pinching ougs, .either. "Never mind, Dumpty", said

Anita..."I'll help you straighten up Give me your pitcher Fatty, and if there are any bones I'll have them out of it in three minutes. you'll be ready to start with the rest of us for the coasting hill."

A few momens later the Blessed Mother's Hill, so called because of he statue that crowned its summit, was black with children. Anita and Humpty had a new sled, the Arrow. Returning to the top of the hill after a fire engine. Anita spied the other half of the "Clover" piloting a beautiful sied, the Snowbird. Button-On Ensemble Is

With just one skirt and a change of blouses, you can achieve two complete ensembles. For general wear, button a bolero jacket onto a matching skirt of brown tweed flecked with red: repeat the red in collar, jabot and buttons; add a beret of the tweed and a pair of brown one strap pumps, and your costume is smart from top to toe For more formal wear tuck an eggshell satin blouse into the skirt (or wear it outside with a short tweed Jacket), choose a draped brown felt hat, brown suede pumps, caracul beige stockings, a brown suede purse with red trimmings and red beads .- Woman's Home Companion.

#### Milady Should Dress to

Her Height, Writer Says Very often the directions to the tall woman as to how to dress seem all to be simed toward making her look shorter. The short woman is advised pricat sale to wear up and down stripes, high trimming on her hat, high heels on her shoes, skirts as long as possible-all with an effort to add a cubit to her stature. Just as if there was but one standard or type of beauty, and all our efforts were to be directed toward making ourselves appear as nearly as possible of that proportion.

If you are a little woman, says a writer in the Washington Star, don't try to look tall. There is need enough apply for a position as teacher, for pretty little women in the world, shall see that she is appointed.

charm, and she is far more apt to look charming if she dresses to her type, accentuating the long graceful lines, than if she wears stripes running round. and round, perfectly flat hats and heelless shoes. These things make her took shorter, but at best only a little shorter. If she put as much thought and time into an effort to look comine. ly pretty she would be spending her time to better advantage.

Remember, too, that plumpness short of excessive obesity, is not abnormal and is therefore not anattractive. Likewise stenderness, short of emaciation, is not a sign of disease and is therefore consistent with beauty. It is undoubtedly wise for the woman of excessive leanness or fatness to camoudage her proportions according to certain well established principles of design. Certain colors are in themselves "large" and certain others diminish the apparent size of the one who wears them. Black and navy blue are among the latter, while tan and gray are the "largest" shades on the list.

The excessively stout or excessively thin woman-in fact, any woman of abnormal appearance has to depend more on her personality than women of more regular and hence more beautiful proportions. Struggle as she may the very stout woman can never charm any one by her figure. But she can charm by her face. Her face may appear so beautiful that you forget her disproportionate figure, her personality can radiate so much goodcheer and magnetism that she is the dominant person in any gathering.

Often in an effort to minimize her stoutness the fat woman arranges her hair unbecomingly and selects hats that make her look old. She wears small toques because she has been told that these give height, whereas brimmed hats give width. She arranges her hair high because it takes a little from the effect of dumpiness. Yet with a hat that shaded her face with a little brim, and with half arranged in a youthful manner, albeit tow on her cars and forebead, her face would be far prettier than in the severe manner that seems consistent with her effort to appear less broad.

#### Reptile Skin Now Used With Costume Jewelry

To see just how far we have progressed since the days when Eve feared the serpent, one has only to look at one of the many fascinating new displays of costume jewelry. One necklace that is sure to charm any sport enthusiast is made of large round heads covered with reptile skin. Sometimes smaller beads of the same skin or painted gilt are interspersed.

Worn with shoes of lizard or snake skin and with matching bags the effect is enough to captivate the most fastidious of the feminine sex.
