Exchange St. Garage

Experts at Washing

An auto's best asset is its appear

No matter how decrept the bus nay be inside, a finely-polished body

will boost its value by a considerable degree. And it seems that a clean

car runs better, too.

But be careful how you wash that

car. You may notice that some ma chines though clean, are dingy in appearance, have lost that fine gloss which denotes a newly-finished car.

That gloss can be preserved but

proper washing is necessary: For an auto finish is rather deli-

mar the polish and the result will be a dull car, no matter how hard or

how often you work at cleaning it.

But a host of motorists have learned this. They know how to pro-serve that the polish, and their care

are always shining examples of the

Exchange Street Garage, located at 211 Exchange Street. The latest

equipment is used designed to ther

oughly clean without marring and

cars washed at this garage look as sleek as when they first left the fac-

Simonizing is a specialty of the Exchange Street Garage—a complete 10b for \$5.00. Simonizing saves both

time and money and the process guards the beauty of any motor car

No one likes to drive a car which looks old and shabby. Neglect adds

to its ill appearance which simonising corrects. It is far easier to keep a simonized car looking clean and bright. Grime, dirt, rain and in

clement weather damage the finish

but simonizing adds to beauty, mile age and makes the finish last longer

STRANGE BUT TRU Catholic Facts But Little Known

By M. J. MURRAY

Among the early parishioners of St Patrick's Church, Washington, D.C., were Capt James Hoban, architect of the White House ; Major L'Enfant, who diew the plan of the Capital City; Roger Brooke Janex, Chief Justice of U.S. Supreme Court. Rev. William Matthews, in 1805, became the second pastor of this church. He was the first native-born priest in the United States. One of his assistants, Rev. Charles Constantine Pise was chap-Tain of the U.S. Senate. 1832-1833

The names employed to day by scientists for the various elevations and depressions on the Moon's surface were invented in the 17th cent by the Italian lesuit Astronomers fathers Riccioli and Grimaldi
