The feature bout of this show brings together "Miss Tarzan," of New York, and "Terrible Tessie" Terry, a Brooklyn red-head Miss Tarzan, say the balley-hoo artists. is no "cream puff" hitter. We hope she knocks Miss Terrible Tessie's lipstick down bor throat and then sprains her ankle in the marathon dance which follows the bouts.

Perhaps the girls of today are rightly termed modernistic, but too many athletic_events of the "show type" serve to cheapen the modern miss. Mildred (Babe) Didrickson, supposedly the best all-round girl athlete in the world, last week made a novice of by a Philadelphia lassle who owns the title "American while the Champ ran off 200.

When John Q. Public gets wise to the fact that Miss Didrickson's track records don't excel the average grammar school boy's efforts he may keep his four bits in his pocket, but we're inclined to believe Babe will have made a bank roll for herself before that knowledge sinks in.

· Just recently we pladicted that 'Sleepy Jim" Crowley may have pulled a boner by giving up his post at Michigan State for a berth at Fordam. The news leaked out last week that the Monday Morning coaches on the Fordham Alumni are incensed that "Hiker" Joy, Frank Cavanagh's assistant, didn't land the campaign is over, that the \$3000 inworth it.

This is No. 5 of a Series Describing New Products Being Manufactured by Long-Established Rochester Firms

To Meet New Needs - - -To Open New Markets ---

"Tycos" Products Adopt **New Dress**

Taylor Instrument Companies' familiar "Stormoguide" is now on the market, re-designed by the famed artist, Walter Dorwin Teague. The firm reports augmented sales of this weather forecaster as a result of its new and modern dress.

The Tycos Recording Thermometor, long standard equipment in thousands of industrial plants, has been perfected and likewise given a new design. Other products, manufactured in Rochester by the Taylor Instrument Companies, are shortly to make their appearance under new and improved forms. Company executives, basing their opinions upon results already obtained by the Stormoguide and the Recording Thermometor, are confident that these changes will "meet new needs-open new markets"-and will speed up manufacturing and employment.

Here is another proof of the progressiveness of Rochester manufacturers. When time brings the inevitable upswing of the business pendulum. Rochester manufacturers will be ready. Futher-they are taking definite steps, here and now, to hasten the arrival of better times. Instances such as this justify renewed confidence in Rochester and its people, and promise increased business and consequently increased employment.
