Congscience—The Dictator

Radio Talk Given By the Rev. William J. Mahoney, C. M., J. C. D. Over Station WHAM, Sunday, June 4

What is conscience? A popular answer to this question would be conscience is the voice of God within us.

Primary Notion of Conscience Primarily, conscience is a judgment of reason in moral matters. It is reason functioning in the sphere of morality.

Secondary Aspect of Conscience Conscience in its secondary or resultant aspect is an irresistible dictate. It is irresistible in the sense, not that a man cannot act against its voice, but in so acting he cannot escape the humiliating sense of doing wrong.

Conscience Must Be Guided While accepting the truth that a man should reverence his conscience as his king—yes, as his God—one should not commit a heinous act just because he believes that the voice of his conscience is really and objectively the voice of God.

Moral Faculty Possible of Development Conscience is not infallible. As reason can make a mistake in mathematical calculations, so reason can make a mistake in moral calculations.
