RESCUED from SILENCE!

A mother who has never heard her baby's voice can hear it now. A young man of twenty-two years of age was pronounced deaf and dumb at birth. He hears now, and is learning to talk. A cultured woman, past ninety, has not heard in 25 years. Now she hears all that is said by those around her-natural voices, not shouts. A famous woman-author dreaded the four walls of silence closing in on her. That dread is gone forever.

The Super-Sonotone has done all this! Call for a free test. Send your name and address for free copy of "Science's Newest Hearing Technique."
