IT'S THRILLING TO TAKE CHANCES. but NOT WHEN YOU BUY HOME FUEL. You're taking no chance when you order 'blue coal'... Its blue color is your protection. TWIN THERMOMETER - TEST PROVES ANTHRACITE BEST. In a room heated by radiative heat place one thermometer on the floor and one at eye level. While the burner is on, both will rise, but the one on the floor will rise much faster. The "on and off" operation of coal and gas burners causes the air to pile up on the floor, and while the temperature at eye level may be 70°, it is much lower near the floor. With anthracite there is always a supply of heat to the system to prevent this.
