HOW CHRIST LIVES IN THE FAMILY

The Christian family is the cornerstone of society in Europe and America. For Catholic families the one great hope of civilization in the disturbances all around us [illegible] don't know this and most other people would not believe it if you told them but it is the simple fact.

The Catholic fathers and mothers can save the world this way. Yours by the way they bring up their children. More important here they must make the home a glowing center of the Christ life. There are certain basic things about the home and the family that even little children can and should know. The things we know from early childhood are indeed that it is almost impossible to get them uprooted from mind and heart at a later date. They are a natural part of activity for the whole lifetime.

The little child does not grasp certain things by the fact of living in a Catholic home for instance he knows the meaning of family mother brother sister order peace joy obedience union love security permanency of his home. On the basis of this knowledge through experience he should be taught these essential principles:

(1) God makes families. The way He makes them is called marriage. Marriage is holy it comes from God. Our Lord blessed marriage and made it a Sacrament. A sacrament is a channel through which people receive graces. Parents receive life. Grace makes them children of God and through grace we live His life.

(2) God makes families so that people can be very happy and love and serve Him. God gave us Our Father and Our Mother and children. Each one has things to do to make the family happy. The father must work the mother must keep the house and children and father well and good children must help their father and mother as much as they can. One very good way to help them is to be [illegible] the [illegible] does what God wants him to do the family usually [illegible] to be together and be [illegible] other.

To be continued.
