

KEEP the U. S. A. OUT OF THE RED!

THE TIMES are out of joint . . . and it behooves every thinking citizen to consider the dangers which threaten his individual and community interests, to be aware of the hazards which jeopardize the safety and well-being of the very nation. Much is written and spoken on the subject of Communism, and other forms of absolutism, which are un-American, often un-Christian, usually un-sound. Few of our people pause to think about their own stake in the flux of events. Even fewer know just what the trend of events means, or why and how it concerns them directly. Blindness AND indifference add to the dangers . . .

WE CANNOT continue to ignore or flout the threats to our social, moral, political, and economic well-being which are inherent in the subversive activities of the Communist and his fellow agitators. We cannot longer permit that the issues be obscured, that the pitfalls be veiled, that the people live only partially aware of what is happening around them. The time has come to throw a blinding light on the subject in all its phases, in all its manifold aspects, in all its devious windings. The time has come for intelligent consideration of the situation so that we can act, —rightly, soundly, and . . . together!

IT CAN HAPPEN HERE
unless we work together!
