Brands Communism A Foe of Democracy— Traces Spread of Red Menace in U.S. First Report On lilness

> (The author of the following article—the first of a series on the study of Communism—is president of the International Catholic Truth Society, chairman of the American Committee Against Communism and

> > By REV. DR. EDWARD LODGE CURRAN, Ph.D.

In the first place the writer wishes to congratulate the ter the Valican newspaper affirmed his ability to endure and check the CATHOLIC COURIER for its editorial decision to meet the issue of Communism clearly, courageously and convincingly. His Holiness is suffering from

From time to time all our Catholic newspapers have warned their readers against the evils of this Communistic scribed as heart disease hardening, menace and directed their attention to the comfort which prove the falseness of such a li- of the arteries stomach disorders Communism has received in certain quarters of our Ameriand insufficient blood direulation can life.

### A Dangerous Comfort

Some times the comfort given to Communism by various the following statement on the groups in our American society has been due to indifference.

Pope's condition during the past Some times it has been due to sympathy for the Tage. Some times it has been due to sympathy for the Left on the part of certain American liberals, who, in the very same gesture of liberality, reveal an inconsistent intolerance for things and personalities on the Right. At all times such comfort is dangerous.

The editorial decision of the CATHOLIC COURIER then, The fundamental cause of the to indulge in a concerted and constant press campaign tosclerosis with a prevalent mine ar against Communism in 1937 is a happy omen for the future.

### Communism A Known Quantity

Fortunately, for the body politic, the essence of Communism is known.

Fortunately, also, the causes which contribute to the pread of Communism are likewise known. Fortunately, again, the methods and remedies which should be used in stopping the growth of Communism are also known.

Unfortunately only a few of our secular American newsapers have taken a strong or intelligent attitude toward he question of Communism. Very few American newsvapers have devoted a single editorial to the subject of Communism.

## Stalin's Word Is Law

Denunciation of Fascism is welcomed as an editorial selicy by many American newspapers. Why all the rhetorial warnings against the possibility of Fascism which coasts of no American Fascist Party and not even a chirp against he actuality of Communism which does boast of an Amerian Communist Party?

Communism operates in America through the medium \* of a Communist Party of the United States as well as hrough paid agents of Moscow who come as the representaives of the Third International or Comintern or International Communist Party whose headquarters is in Moscow. whose evil genius is Joseph Stalin and whose word is law as far as the Communist Party in Rochester, in the United States or anywhere else is concerned.

Since Communism is the determined and decisive foe of ill democracy we should expect general criticism of the vpocrisy of Spanish Communists who talk about Spanish Democracy and of American Communists who announce heir support of the Red Spanish government as an organ of democracy.

## Communism Defined

Communism is the negation of Democracy. Communistic Russia prevents the exercise of all democratic rights on the part of its citizenry. When a Communist announces that he believes in democracy it is the same as though a blind man should announce that he can see.

The Catholic Press of the country has directed its forces against the mena e of Communism. • The CATHOLIC COURIER rightly believes that the time has come to inrease and concentrate its attacks against this Communistic nemy of God, of the home, of the school, of society, and of our American form of government.

## No Longer a Theory

The articles which will appear in these columns will not nerely defend religion against Communism. They will likewise defend the very existence of our country. As such they will descrive the support and gratitude of every American citzen, Catholic or non-Catholic, in Rochester and throughout In the United States of America Communism is no

onger a theory.

It has become a probl m. American labor unions are cryng out against the communistic racketeers who are trying togain control of their operations.

Mothers of children in our Public Schools-Elementary, secondary and Collegiate—are amazed at the communistic nfluences to which their children are subjected by certain rofessors of history and the other social sciences.

## Hatred Toward Religion

Religious men and women of every denomination are eroused by the evident antagonism and hatred of American Communists towards all religion.

In certain large cities, such as New York, Communists: have spat upon the ordained ministers and devoted representatives of religion.

Everywhere throughout the nation the forces of Come munism are indulging in wholesale propaganda and exploits

Communists mask their activities under the ruise of cer tain Peace Societies. The American League Against War and Fascium is a

communistic organization. Communists are bent upon ex-(Continued on Page 3)
