**Company Unions**

"Under nearly all company union plans, officers must be chosen from among persons on the company payroll, whereas under union collective bargaining, no officer need be chosen from among the company's paid personnel. The difference is vital. Under the company union arrangement the employer, because he controls the jobs of the company union officials, virtually controls their bargaining with him. **Survey Sees Red Activity Wide In U.S.**

**Facts Garnered At Request of Bishops Reveal Moscow Control**

N. C. W. C. New Service

(Following are excerpts from "Communism in the United States: A Survey," a pamphlet with study outline published by the National Catholic Welfare Conference, 1117 Massachusetts Ave. N. W., Washington, D. C., presenting the findings in a report of its Social Action Department of a survey made at the request of the general meeting of the bishops of the United States. The report puts out the basis to which the American people are being subjected by Communism, gives facts and figures, and deals in detail with the subtle activities of the Communists in the United States. On the back cover are listed the titles of eleven other N. C. W. C. pamphlets, several of which also deal with Communism.)

The Communist Party in the American section of the Moscow Communist International Party. It is the strongest, ablest and most active organization seeking common ownership in the United States and seeking it through a revolution led by a cohesive party.

The Party, having a paper following of some 50,000 East European immigrants when it was organized in 1919 by left-wing Socialists, soon dwindled and until the Depression stayed around 7,500 members. During that time it was strongly revolutionary, rigid in its ideology and methods and against all other organizations and movements.

During the worst of the Depression and before 1925, ideas and practices remained the same except that the Party sought national and international organization among the new unemployed and ex-soldiers and created temporary bodies to lead them.

**Moscow Ordered Change**

Late in '24 and definitely in '25, under orders from Moscow it changed face. The rise of Hitler in a country where a strong Party flourished, the delay of the "revolution" fear of suppression, and Russian foreign policy dictated the change. He it wanted friends for the Party and friends for Russia.

Its membership has passed from 20,000 in '24 to 30,000 in '25 to 41,000 in '26 minus an unknown change) and to a little over 40,000 in June 1927.

The Party is not a working people's party but mostly one of intellectuals and white collar people. Manual labor is only one-third, of whom by far the most are small industrial workers. Only 2 per cent are members in '26. Farmers are 1 in 27 members. One-third are women.

Nearly half of the members some 19,000 or 20,000 are in one city, New York, and one state, California. Another 10,000 are scattered throughout up-State New York, Massachusetts, Pennsylvania, Ohio, Michigan, Wisconsin and Minnesota.

**Rigidly Trained**

The few active members do an amazing amount of work. Rigid training and stern discipline, a compact few acting under orders, a sense of organization that lets the Party reach any number of members quickly, the creation of closely dependent organizations and the cooperation with every organization possible, a continued advocacy of popular reform, a time when so many are confused and reconstruction so needed, a membership, sacrificing, fiery, unscrupulous and obedient, and a messianic theory, make of the Party a most dangerous weapon.

At the center, a general committee under a Chairman and Secretary, and an inside policy committee, dictate the Party's whole life in accord with orders from the Moscow central committee and offices.

In turn, the American central committee controls equally rigidly local policy and officials.

**Divided Into Groups**

At the center also are offices to care for different groups and different subjects: Propaganda, labor, women, foreign language groups, youth, Negroes, farmers, press, literature, war, imperialism and research.

State and local organizations follow the national plan. An organizer a director of agitation, and a literature agent appear the minimum number of officials.

Thus they have organization for voting and political agitation, organization by place of work and place of living to be reached easily with Party orders either for general or special work; organization by groups or by other organizations for the same purposes; secrecy, flexibility.

Party meetings now, it is reported, consist chiefly of plans of

Father Mulvey reports nearly 4,000 conversions by the Holy Ghost Fathers since they took charge of his parish 20 years ago.

When a huge audience was surprised to find a great silence in the theater, the Carol Singers of the Holy Ghost Fathers stepped forward to sing. **Answer Is Obvious**

An economic regime that denying responsibilities has to be regulated to the limit of its ability to even part of its responsibilities. And then we would not need enough. The automatic of simple regulation becomes either the totalitarian regulation by a Fascist or the partnership with employers in the effort to create Communism. New Guilds - N. C. W. C. Washington D.
