EXPLAINS METHOD OF MAKING LOANS From Federal Agency For Home Building

In the case of a person who desires either to purchase or to build a home, it should first contact a Savings and Loan Association or a bank which is an approved mortgage lender.

In the case of new construction, one must submit plans and specifications of the proposed dwelling. In this connection, in order to present what is termed "Jerry Building" and to assist a home builder to obtain a standard built house, the Federal Housing Administration has prescribed minimum specifications.

After the approved mortgage or lending institution has thoroughly investigated the applicant from the standpoint of credit and the ability to pay and has made an exhaustive analysis of the plans and specifications, the application and the plans and specifications are forwarded to the office of the Federal Housing Administration where further exhaustive investigation is made.

As has already been stated, the F. H. A. has streamlined to a substantial degree "Jerry Building" by prescribing minimum specifications. In addition, it has provided for a single mortgage plan and has made it possible for home owners to obtain long term mortgages up to 25 years with monthly payments of interest and principal to pay the debt off in full in this length of time.

MISSION BOARD Asks Assistance For Medical Work

A new appeal has been sent out by Rev. Edward Garasche, S. J., as President of the Catholic Medical Mission Board, for contributions toward Medical Kits to be sent for the care of the suffering refugees in China.

Experience has shown that these kits are very practical and really invaluable to the Missionaries, for they are so composed that not only professional missionaries but anybody who knows the rudiments of first-aid, can use them effectively.

At the same time, an appeal is made by the Catholic Sisters in charge of the Leprosy Asylums, for money to buy materials necessary for the preparation of chaulmoogra oil, the only remedy yet discovered for leprosy.

MISDIRECTED TEACHING Scored by Educator In Address at Notre Dame

NOTRE DAME, IND. (N. C.)—Assailing teachers throughout the country for their failure to instruct students in the principles of American government, Charles E. Manion, in an address Tuesday night at the Summer School commencement of the University of Notre Dame, decried the "misdirected teaching" that permeates school rooms under the guise of "political science."

Mr. Manion, who is Professor of Constitutional Law at the University of Notre Dame and Director of the National Emergency Council for the State of Indiana, told his hearers, many of whom were high school and college instructors, that "the average American pupil of civil government knows only how the government works and so on ever tells him why it was called upon to work in the first place."
