How To Repair Binding Doors

When Dampness Swells Frames

Damp weather is most often the cause of swelling doors. Absorption of moisture results in the swelling of the frame and door and frequently causes the point of contact to soften and become sticky.

A WELL BALANCED FLOOR PLAN

In the preparation of small, one-story, one-bedroom designs there is often difficulty in arranging good exterior balance to the house.

Front Entry Catches Eye

Make It Your House Appeal

One of the very first items that catches the eye about a house is the front entry. The front door probably has more influence in creating the "first sight" impression of the entire home than any other single item aside from the shape of the house itself.

FHA Celebrates Sixth Birthday

The Federal Housing Administration will observe its sixth birthday today, Thursday, June 21.

Light Absorbs Closet Moisture

Closets are likely to become damp during prolonged periods, and this will frequently result in mildewed clothing.

Stock Plans Aid To Builders

It is generally accepted that most houses designed by architects are more individually planned than houses built from stock plans.

Height Is Important In Chimney Operation

Height plays a considerable part in the efficiency of a chimney. Many authorities maintain that the height of a chimney should be 30 to 35 feet.

REPLACING WORN STEPS

In planning home improvements under the F.H.A. plan the home owner should always think of safety as well as appearance.

'39 BUILDING LEVEL MAY BE EXCEEDED

A volume of residential construction during 1940 which may equal, or even exceed by as much as 15 per cent, the number of nonfarm buildings commenced during 1939 is seen by the Federal Housing Administration.
