New Heating System

During the past five weeks the men of Saint John's Church have pooled their efforts and talents to install a complete new heating system in the church and basement hall.

Carpenters, plumbers and painters of the parish succeeded by many other men tore down the old boiler and installed a new boiler and radiators working each evening and on Saturday afternoons.

As a companion project the men are adding 600 feet of floor space in the hall. The entire hall is being remodeled. A new lighting system has been installed and the kitchen is being rearranged.

It is expected that the projects will be completed by October 25th. Very soon a party and supper will be given to all men who donated their services during the past five weeks.

The old boiler removed from the church had served well for 40 winters.
