

Blesses Victory Garden Area

Montreal Through the cooperation of the Canadian National Railway, a great field has been made available for individual victory gardens, which have been organized through the League of Catholic Workers. Already 113

victory plots have been arranged. The Rev. E. G. Ward, parish of St. Mary's is located, situated at the blessing of these victory gardens in the presence of a large number of persons who are engaged in their cultivation.

The Fruits of Victory—Gardening.

War production workers and wives of servicemen attend a canning class at the USO Residence Club, Tampa, Florida, operated by Women's Division of the National Catholic Community Service. The class is under the supervision of Caroline M. Boogher, Hillsborough County Home Demonstration Agent. The squash and turnips are from the club's Victory Garden, where 2,000 sweet potato slips, 400 tomato plants, rows of peanuts, corn, beans, field peas, pumpkin, cucumber, watermelon, okra, eggplant, and green peppers are under cultivation. ROCHESTER DIOCESAN COUNCIL

National Council of Catholic Women
Office—Catholic Evidence Library
Main Floor—Columbus Civic Centre

Members of the affiliated organizations in Rochester Diocesan Council, National Council of Catholic Women, received the following War Stamp Campaign appeal, this week:

ARE YOU ONE IN A MILLION?

We Hope You Are, Because N.C.W.C. is campaigning for 1,000,000 buyers of U. S. War Savings Stamps at the 25c Denomination!

Do you know that 2 twenty-five cent stamps will buy two dozen bandages for the sick and injured? 6 twenty-five cent stamps will buy one first-aid kit? 8 twenty-five cent stamps will buy a warm blanket for a soldier or sailor?

N.C.W.C. is campaigning for 1,000,000 givers of U. S. War Savings Stamps!

Do you know that 1,000,000 War Savings Stamps to be invested in interest bearing Series G Bonds will eliminate the need for annual appeals for the maintenance of the School?

Give a War Savings Stamp to the National Catholic School of Social Service, the School that is sponsored by the Catholic women of America.

N.C.W.C. is campaigning for 1,000,000 "Go Getters" of U. S. War Savings Stamps!

Do you know that the National Catholic School of Social Service is training the Catholic social workers we need now, and will need in greater numbers in the period of war relief and rehabilitation?

Give a stamp, yes—but get a stamp, too, so that the N.C.S.S.S. may put into action our motto—"Faith and Service—For God and Country!"

National Headquarters reports returns already in from several dioceses.

We gratefully acknowledge renewal of the N.C.W.C. affiliation of the Alumnae Association of Sacred Heart Academy.

ON THE HOME FRONT

Linex Closet in Waste Space
Every home-maker knows how many steps could be saved if this linex could have a special

one home that we know of space for such a closet was going to waste all because cupboard doors closet in the kitchen or pantry. In

Housewives To Answer

Take out your pencil and grade yourself on the "Housewife's War-time Rating Chart." If you can grade yourself 100%, give yourself a pat on the back—you deserve at least that—and go back to your job; you're a good soldier! If you can't now give yourself a full count of 10 on each of these 10 questions, there may be a good reason for it. At least, you can work toward that ideal 100 points.

- Are you—
1. Conscientiously helping on the tin can and fat salvage program?
 2. Respecting the law by driving at 35 miles an hour when using your car for essential transportation?
 3. Taking the best care of your household equipment to make it last?
 4. Not hoarding?
 5. Shopping between the hours of 10 and 3:30 to relieve the transportation problem?
 6. Carrying all packages possible to save on deliveries?
 7. Serving your family well-balanced meals?
 8. Cooking foods to preserve all their nutrients?
 9. Planning your market lists before you go shopping?
 10. Buying War Bonds and War Stamps regularly?

One 'New' Omitted

Herbert Hoover, our ex-President, is said to have made this observation: "We have had in the last 25 years the New Freedom, the New Deal, the New Deal, the New Deal, the New Deal, the New Liberty. Now we are fighting against Hitler's New Order and Tojo's New Asia. This war seems to revolve around the word 'new,' the New Testament being often omitted."

or drawers would interfere with the door shown here in the small sketch. At the right you see how that space became an efficient linex closet complete even to a smart laundry bag.

The high compartment has a door of plywood. Below this are shelves with a curtain on a shade roller. The curtain runs up and down between the shelves at the left.

NOTE: Mrs. Spears has prepared a large sheet giving complete working sketches for making this closet and the laundry bag. All dimensions are given and step-by-step directions are illustrated. An intimated list of all materials and fittings is included. Ask for Design No. 236 and enclose 15c to cover cost and mailing. Address Mrs. Spears, Drawer 111, Bedford Hills, New York.

Joan of Arc is stitching steel for fighting ships!

Joan's a welder, of course—an arc welder. She's helping to hurry another ship down the ways to war. What's the magic of this welder's rod that builds boats so much faster and lighter? What's the secret of the blue arc blazing between Joan and her weld? Electricity! Thousands of Joans—and Jim and Joes—busy on hundreds of freighters and fighting ships, depend on electric power for their amazing accomplishments. And this is just one of the many marvels of production that is made possible by the fact that America has the world's greatest power systems and produces more electric power every year than all the nations combined.

But, just because we have the power doesn't mean any license to waste it. Much electric power is made from coal and coal is a vital war weapon that should be conserved. Likewise railroad equipment that transports it. Electric light bulbs use tungsten, that precious metal so essential to the manufacture of Radar, the mysterious detection device that is proving so effective in this war.

So let's all save electricity in order to save all these things and help speed the glorious day of victory. At home use what you need for proper light, safety and the operation of essential appliances but avoid all waste and careless use.
