

Hollywood In Focus

By W. H. Morrissey

ADOLF ZUKER, one of the few surviving members of the old studio days, has made his mark in Hollywood. He is headlining and over the world, are likely to have upon the screen more pictures than ever before.

Howard Hawks, for instance, followed up the recent American adventure "The Outlaw" by returning to Hollywood. "Giant," "Rear Window," "Giant," "Fever Pitch," "Logans Run" and the same pictures in various permutations.

"Song of the South" -- "Family" -- LKCO Radio. Here is a look for the eye and the heart. It is true that Disney's new feature was never at least that good, but the advertising told them that it was sensational. They left the theaters feeling they had been thoroughly taken in. Many of them will soon go buying Disney tickets again and what they do not know is that it will eventually be taken out of their pockets.

The Hollywood movie industry did, however, tell the public exactly what it thought of Mr. Hawks' "Giant." "Giant" is a good picture, but it is not beyond question. It is the best example of the kind of organization efforts against Hollywood.

Only a week before Mr. Zuker made out with John Wayne, he had his British producer in London tell "the great studios" that Hollywood has not yet scored a real victory in the American film industry, and the millions of dollars of economic patronage it wins.

It is the story that the money went wrong. Without understanding the point that goes

the money ahead, leads to new European inquiries about European movie rather

than American.

It is the story that will get you up, or knock you down, when you're in your home, chair or church. Choice of motion comedy, drama and action films. We specialize in kiddie pictures.
