

Nation Takes Reds too Lightly Hoover Warns

New York — (NC) — With a cool reminder that few believed Hitler when he proclaimed his plans for Nazi domination, J. Edgar Hoover, director of the Federal Bureau of Investigation, in an article, "Red Fascism in the United States Today," which appears in the current issue of The American Magazine, warns that the "red scourge of communism in America is boring its way through our land like a termite" and that its power and influence are out of proportion to its membership.

"The objective of the Communist party of the United States of America," Mr. Hoover writes, "is the destruction of the American way of life."

If the American way of life is to be preserved, the menace of communism must be met and its forward march halted, he counsels. He suggests that truth, which proved the nation's propaganda in World War II, is the best weapon against communism today.

Mr. Hoover chided that too often liberty-loving Americans dismiss the menace of communism as inconsequential, and forget that communism is a cold, harsh and ruthless system which builds slowly "to the day when our democratic government will be superseded by a godless, tyrannical, communistic dictatorship."

He reminded that the communist movement in this country dates back to 1919 and that Francis Biddle, while serving as Attorney General in 1942, ruled that the Communist Party from its inception, is an organization that believes in, advises, advocates and teaches the overthrow of the U. S. government by force and violence.

Recalls Foster Statement — The FBI chief emphasizes that William Z. Foster, chairman of the party and chief communist spokesman in this country, has stated that the communists of this and every country have only one flag, "and that is the Red Flag."

He reminded that Mr. Foster also has stated that "our party considers religion to be the opium of the people, and we carry on our propaganda for the liquidation of these prejudices."

Mr. Hoover also stresses the efforts of the communists to bore in and obtain control of labor unions.

He recalled Mr. Foster's counsel to a meeting of communist leaders, appraising the railroad unions: "I unhesitatingly say this is the most important 1,000,000 workers in the United States."

You can have a strike of steel workers for six months and the country could limp along, and we carry on our propaganda for the liquidation of these prejudices."

Mr. Hoover also stresses the efforts of the communists to bore in and obtain control of labor unions.

Papal Blessing Given Jew

Montreal — (RNS) — For the first time in Canada, a Jew has received the apostolic benediction from Pope Pius XII in recognition of his contributions to the Franciscan Missionaries of Mary here. He is Ben Obrosi, Russian-born butcher of this city.

Pope Pius granted a petition for the lower made by a nun of the order. The Rev. Fr. said he was aware of the sufferings of the Jewish people and wished the benediction to be a token of his sympathy, and that the act be known to Jews everywhere.

The nun who brought the document to Mr. Obrosi had been on a mission to the Vatican when she made the request to the Pope.

Mr. Obrosi's own rabbi urged him to accept the document and to respect and treasure it.

MISERY IN REICH BISHOP WRITES

Fargo, N.D. — (NC) — An appalling picture of conditions inside Germany has been described by Bishop Aloisius J. Muench of Fargo, currently serving in a liaison capacity between the Church and the U. S. occupation forces in Germany, in an article published in Catholic Action News, monthly of the Fargo diocese.

The Bishop asserts that Germany's harvest did not measure up to expectations while U. S. shipping strikes and other transportation difficulties prevented food supplies from reaching the stricken nation in sufficient quantities to meet winter's added demands.

He said that the suffering was at its height in the largely industrial and urban Ruhr area, where agriculture was never of much consequence.

The Bishop told of stopping off at a 300-bed hospital in Dortmund, which was filled to capacity, and finding the supply of potatoes almost gone as farmers were prevented from donating to the hospital stock by authorities, who exercise rigid controls in battling black marketeers.

Bishop Muench said that in some cities food riots occurred and in Hildesheim posters appeared on walls of ruined buildings urging the people to be calm during a "temporary" shortage of bread and potatoes, while turnips were distributed.

He said every day sees long queues of women before stores trying to get allotted supplies before they are gone.

Undernourishment has brought a high mortality rate, the Bishop writes, and tuberculosis is on the increase among the very old and the very young. The bad food situation is aggravated by a lack of coal, the Bishop said, and the irony of it all is that the largest coal mines in Europe lie at the very door of Cologne, but the miners are insufficiently nourished to carry on their work.

He recalled Mr. Foster's counsel to a meeting of communist leaders, appraising the railroad unions: "I unhesitatingly say this is the most important 1,000,000 workers in the United States."

You can have a strike of steel workers for six months and the country could limp along, and we carry on our propaganda for the liquidation of these prejudices."

Air Terminal Chapel Planned

Montreal — (NC) — A chapel will be installed in the new terminal at the Boston airport, Archbishop Richard J. Cushing announced in a New Year's message. It will be dedicated to the memory of the U. S. Air Force personnel who died in the war, he said.

The Massachusetts State Commissioner of Public Works, Joseph F. Cairnes, who is carrying out the project at the request of the Archbishop, stated that the need for the chapel was apparent to those who realize that several thousand people will be employed at the airport in the near future.
