

[illegible]

1. The first step in the process is to identify the problem. This involves gathering information about the situation and understanding the needs of the stakeholders involved.

2. Once the problem is identified, the next step is to develop a plan. This involves setting goals, identifying resources, and determining the steps that need to be taken to address the problem.

3. The third step is to implement the plan. This involves putting the plan into action and monitoring progress. It is important to stay flexible and make adjustments as needed.

4. Finally, the fourth step is to evaluate the results. This involves assessing the effectiveness of the plan and determining whether the problem has been solved. If not, the process may need to be repeated.

[illegible][illegible]

generally, the money is not being used to buy more land. The problem is that the money is being used to buy more land, and this is a problem. The money is being used to buy more land, and this is a problem. The money is being used to buy more land, and this is a problem.

and nearly a billion dollars
lead for the government to shut
as it planned them hard to
hard. It also meant that too
