of public opinion.

AT FIRST BLUSH, many

people hearing of "labor arbi-

tration" will think of it as ap-

plying to the settlement of

strikes or lockouts when dead-

locks have occurred. That is

sometimes the case. By far

the most frequent use of arbi-

tration apparatus, however, is

in those grievance cases aris-

ing out of labor contracts.

Most every agreement today

between management and the

unions contains some clause

providing for adjustment of

grievances which occur during

the life of the agreement. In

an overwhelming number of

instances these specify a def-

inite method of appeal leading

up to an arbitration tribunal.

thousands of cases are now decided through such machinery, in a peaceful and orderly manner. There was nothing like that on any such scale two decades ago. has been estimated that at least 50,000 labor contracts contain provisions for settling grievances in a systematic fashion, and the large part of these provide for arbitration as a last source of appeal.

in two decisions relating to the Wolff Packing Company, held Of course, this method of the Kansas Act to be unconstimaking settlements has been tutional. Thereafter all measlong established in America. In the early stages it was conures and arrangements in this matter were on the voluntary fined to commercial disputes. basis, n 1940 New York did For more than a centruy a third party has been called make it possible for labor arbiinto certain agreements and tration to come under the statutes of that state, if the pargiven power to make a decision on the merits of the case. ties to the agreement agreed. During that period of 100 years In that case it i be enforced by the courts. Otherwise, the the importance of arbitration decisions made by labor arbiin these commercial difficulties tration tribunals rests on the has grown in extent, until toeconomic powers of the parties day it is a regular feature of the world of business. involved, their respective sense of responsibility and the power

FOR MANY YEARS both management and labor-when it came to having arbitration proceedings enter labor disputes - were chary of the process. Management viewed it as an encroachment on the "rights and perogatives" of those who controlled industry. Labor was still suspiciou of any such method of a "ding grievances becatuse labor was still denied that security of organization which would make it more confident of participating in pro-

cedures of this kind. With the advert of the unions on a wider scale and with their feeling of more assurance has come the far-flung use of the arbitration machinery in labor disputes. This has been necessarily on a volunteer bas-There is one subject on which every branch of the labor movement and the National Association o Manufacturers will agree, and that is the bad qualities of compulsory arbitration. One conspicpublic eye like Harry Hop-ins of impartial chairman in the Ladies Ga. ient industry in the New York market.

Since 1929 there has also existed between the American Federation of Hosiery Workers and the Full Fashioned Hosiery Manufacturers of America an agreement which establishes the office of impartial arbitration chairman. For a considerable number of years this position was held by Dr. George W. Taylor of the University of Pennsylvania, later with the National Labor Rela-

MOST FOLKS DO not know, however, of the permanent umpire agreement in the Milk Industry in New York. This is of specific interest because of the power in the hands of this umpire to readjust the wage scales every year if necessary under a three-year contract. The International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of the American Federation of Labor has entered into this agreement with the milk distributing corporations. Variations of such set-ups run into the steel industry, mining, au-

tomobiles and many other fields. The existence of the permanent umpire has a pronounced effect on the handling ofgrievances at the lower rungs of the ladder in such machinery. The shop steward and foreman, who meet on a particular grievance, have before them always the understanding that this case may be appealed if a decision cannot be be made right there in the the intermediate appelate places-the superintendents of the company and the higher representatives of the union. Out of this understanding has come a unique development, namely, that most cases are

the arbitrator. So it was that no grievance case went to the referee for the first four years of the life of such an agreement between the Carnegie Steel Corporation and the United Steel Workers. And Dr. George W. Taylor reports for the hosiery industry, on disciplinary matters, that not more that two or three cases ever come to the impartial chairman a year although twenty to thirty thousand workers are covered by the agreement.

settled below and never go to

More and more have premanent referees been designated THUS A FAR-REACHING as the last "court" of resort in network for the adjustment of labor difficulties (at least dur-Many people have heard ing the life of contracts) has something of the impartial been cast across America. It chairman machinery in the has come about through the more secure and extended establishment of the unions. That does not signify, though, that all is entirely well. The means of making arbitration a more smooth-working machinery in all industrial disputes. including those which rage at the beginning of organization, have not been fully discovered.

Strikes and lockouts still continue. Every authority on the subject comes to the conclusion that something more must be added, that arbitration has to be put on a more solid foundation. You may read that thought in Charles O. Gregory's "Labor and the Law" and likewise in the consideration of the matter by Dr. Harry A. Millis, former chairman of the National Labor Relations Board, and Dr. Royal Montgomery in their monumental

work on Labor Economics. A little thought will make us come to realize that a moral standard has to be applied here, and that the progress thus made can only go further if such a moral standard is recognized by unions and employing interests alike. Nothing tells more elequently of the intense need for the establishment of Industrial Councils, as recommended by the Popes in their encyclicals on Labor, than this acknowledgement that arbitration has gone far but that stable labor from the gunt of sin is very often ing the vords and works of relations must go much far- necessary.

-A Look at Labor The Common Good

The eyes of the work are on Italy. The outcome of the Italian elections may determine whether or not there is a third World War.

BACTOR

The headline in our newspa-pers the other day is instruc-tive. "Ninety-four per cent-cest bellots." This means that almost every eligible Italian voter took part in the election. This is a lesson for American voters, where not even 50 per cent of the American public think it important enough to vote in a November election.

POPE PIUS XII can take a great deal of credit for this large turn out. Prior to the elections he told the Italian neonia of their serious obligations. He told them that any Italian voter who deliberately stayed away from the polls on election day would be guilty of a mortal sin.

A mortal sin! Think of it. Would the average American believe that he could commit sin mergly by abstaining from voting.

How was the Pope able to make such a deciaration? Merely by making the stalians aware of their obligations to the common good of the community. If the Communists had won the election by real son of newligence, the n ers would have seriously

harmed the nation. The common good of Italy required citizens to vote for Christian minded candidates. The obligation to vote, there-

fore, sprang from the obligation of all Italians to promote the common good of Italy. This notion is foreign to many Americans, even Catho

FREQUENTLY, it is asked: "Where in Rerum Novarum and Quadrageoline Anna does it say that a man is obliged to

join a union?"
"What Pope has ever wild that the union shop is justi-

Ordinarily the Holy Pather does not establish rulings on specific problems until there is a need. Prior to 1918 there was no statement of a Pope of the perjourness of voting in

an Italian election. There are many specific Jabor problems which the Popes have never discussed. For example, secondary boycotts, mass picketing, political contributions by labor unions. Also the union:

swers, the Pope refers Catho lies to the approved authors.
To the experts. These men phrasa their answers to definite professes by applying principles entirclated in other places by the Vicers of Christ.

WHAT, THERETORE, CAR be said of the union shop?

Let us quote Pius XI "It is of the very essence of socie? Justice to demand from each individual all that is nec-essary for the common good."

If it means that people must vote, they must vote. Social justice demands it. If the common good of workers require memberahip in a union, then they are under moral obligation to join. The virtue of social justice says so: What, then, is the exiterion

for determining the morally of the union shop? The requirements of the

common good. or not the union shop is nec Mary to protect the vorters dividual. He might like to be lieve that he is capable of mak-
