Judge Kills Free Textbooks For 10,000 Parochial Pupils

Santa Fe, N. M. --- (RNS) --- Some 19,000 children in 60 pri vate and perochial schools will be stricking from the list of free textbook recipients in this state according to Faul Masters, directar of the state's free textbook division.

The action will follow the judgment Aled by District Judge E. Turnar Hanaley in the so-called, "Dixon case."

Masters seld that by dropping the lengthy list of stydents, senttered over a large part of the state, a saving of about \$25,000 will be made this year. Last year, the affected students received \$29,000 worth of books at an average to the state of \$2.90 each. The action will become effective July 1.

"Concerning books already in the possession of private and parechal schools, Masters saids "I have no order to collect them."

Attorney General Joe L. Martinez in a recent opinion auggested a possible loophole in Judge Hensley's decision. He said that the decision referred to schools, not children, and that it

might he possible to make the distribution of textbooks directly to students instead of to the schools without going contrary to the judgment.
