

THE COMMUNITY'S INDIP

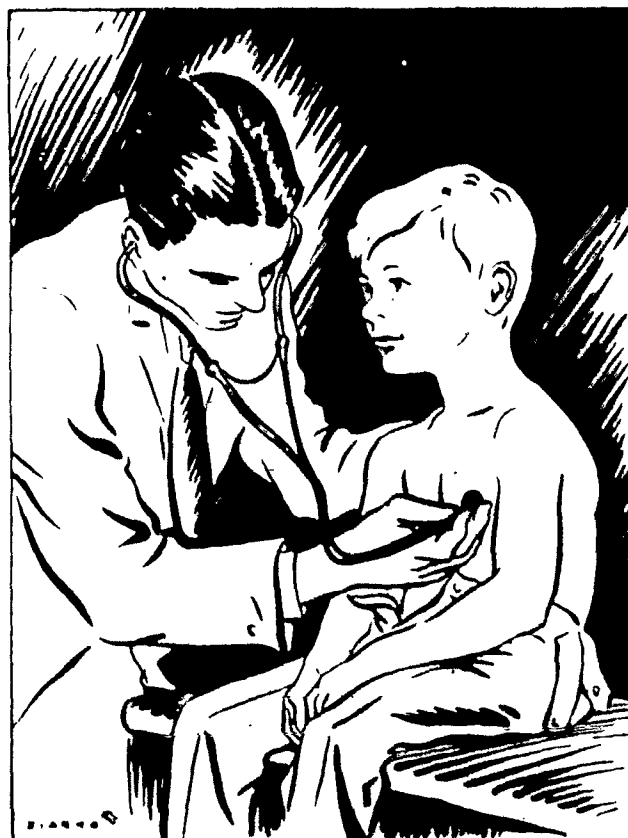

67 APPEALS CCIB

The Community Chest's Red Feather campaign is the community's campaign . . . Because the whole community supports it. Because the whole community benefits from it.

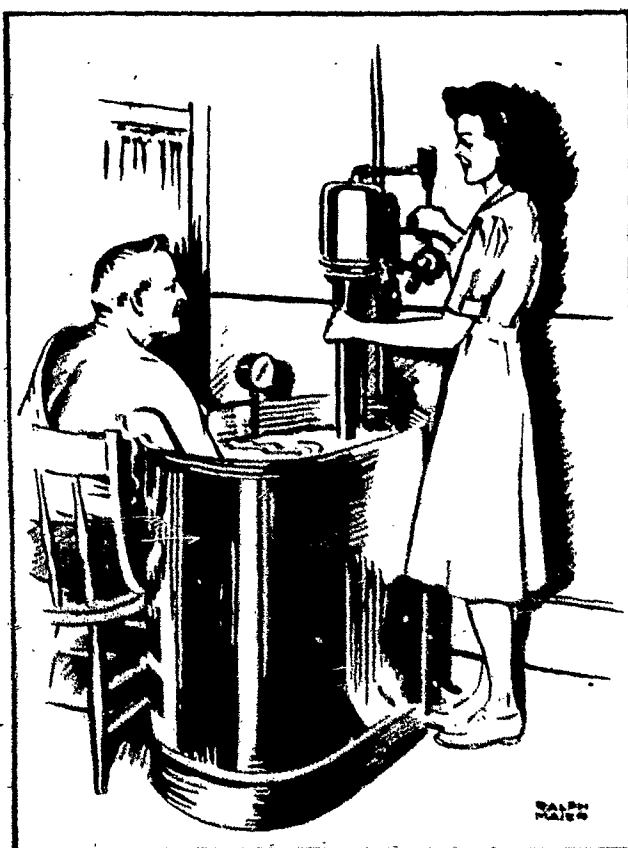

The community's campaign . . . because all faiths plan, pray, and work for its success; because employe and employer, farmer, villager, and city dweller, folks of all income levels, find in the Community Chest a common ground of agreement.

The community's campaign . . . because it's democracy in action. Thousands of people working together, working for each other, as Chest campaign workers, as board members, as volunteer aides of the Red Feather agencies. Tens of thousands of people giving together. Not because they're forced to, but because they want to!

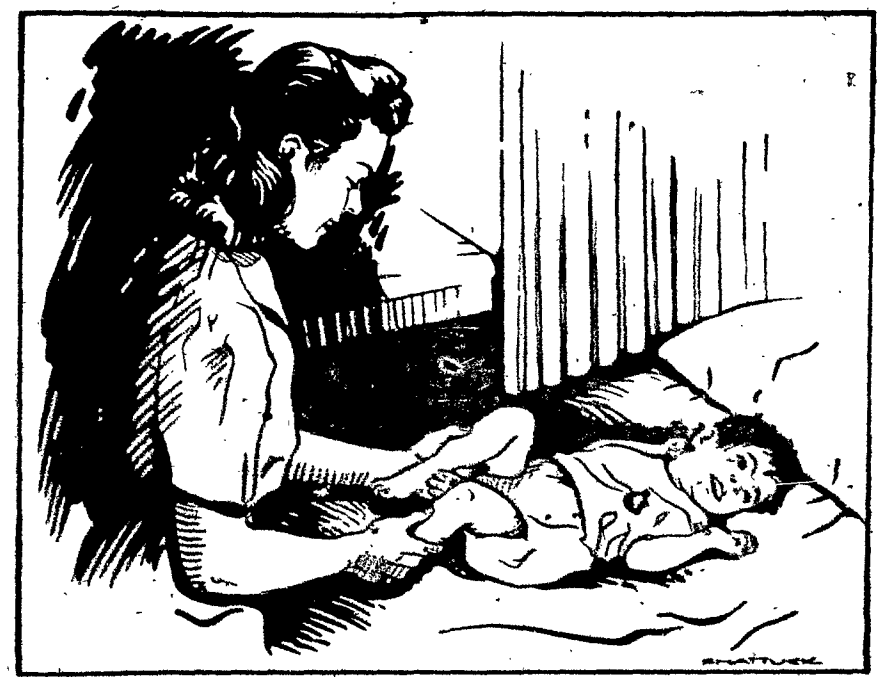

The community's campaign . . . because it includes voluntary health, welfare, and character building services of all types. (The Rochester Community Chest is the most inclusive Chest in the United States.)

Over 29,000 persons used Red Feather clinics during 1949; Community Chest funds help make part-pay and free clinic service available.

Red Feather agencies to serve the handicapped—including the blind, the hard of hearing, the crippled—aided 1,890 people last year.

Special therapy helps palsied children at Treatment Center of the Cerebral Palsy Association, one of newer Red Feather agencies serving the people of Rochester and Monroe County.
