(Continued from Page 1)  
The plan involves three main features: the reconstruction of the present structure, the construction of a new structure to the east of the present one, and the construction of a new structure to the west of the present one.

In addition to the principal structure, a broad area would be cleared on all sides through the purchase of the present small buildings housing various shops and dwellings. Along the sides of the great enclosure setting off the new basilica would be a series of smaller structures for members of the various communities concerned with the care of the churches and conducting devotions.

### Acheson Hits 'Hypocrisy' in Red 'Stockholm Peace' Bid

(Continued from Page 1)  
THE DAILY Worker, national organ of the Communist party in the U.S., has another free-wheeling translation. It quotes the prelates as saying: "We can understand in this nightmarish atmosphere how the appeal of Stockholm against the use of atomic weapons has attracted many generous spirits."

sense of humanity can approve the use of modern weapons which strike indiscriminately at soldiers and civilians, and which blindly spread death over areas which daily grow wider and wider with man's increasing scientific knowledge.

The joint pastoral of the French prelates said, in part: "In such a nightmarish atmosphere, it is understandable that the Stockholm Appeal against the use of atomic weapons should have seduced many generous minds. The question is persistently put to you, your priests, and to your Bishops asking whether we condemn the use of these atomic weapons. But such a question, addressed to the disciples of Christ, scandalizes and revolts them."

"We are convinced that mankind will be disgracing the intelligence God gave it, if it persists to evil ends scientific knowledge which could be so fruitfully used for good."

"AS THE POPE said two years ago, no one with a true sense of humanity can approve the use of modern weapons which strike indiscriminately at soldiers and civilians, and which blindly spread death over areas which daily grow wider and wider with man's increasing scientific knowledge."

"We therefore ask statesmen, who at the present time carry a crushing weight of responsibility, not to give way to the horrible temptation of employing the means of destruction, and to do everything in their power to reach a common agreement for an absolute ban on their use."

### Russia Return To U. N. Tied To Red China's Role

Washington, N. Y. (AP)—There is much speculation at United Nations headquarters here as to whether the Russians will ever return to the U.N.

A possible hint as to the Russian intentions regarding the U.N. may be found in the fact that the Information Section of the Soviet Embassy no longer maintains a permanent detachment in the U.N.

Under the main of procedure a Council meeting is held only at the call of the president. It has been suggested that the Council will review the rules to avoid the possibility of having the work suspended during August, especially in the light of the Moscow situation.

### Catholic Chapels at Persia Oil Fields

Rome (AP)—The port of Kuwait on the Persian Gulf and its surrounding area which is under a British protectorate, has developed a Catholic population of 2,000 where four years ago it had practically none.

A Carmelite priest, the Rev. Troiano Stella, O.C.D., took up residence there in April, 1948, to look after the spiritual needs of the faithful in this growing international community.

Mass was celebrated for a time in the moving picture theatre. However, an electrical center has now been transformed into a chapel and another small chapel was established near the oil wells.
