interlocking blank name sections, as well as, the "Key" name "WASHINGTON." To solve this simple puzzle problem, all you need do is fill in the blank squares, each with a separate letter to spell a name, selected from the "NAMES IN THE NEWS" Master List. Spell from left to right and from top to bet-tom. Starting with any one of the three let-ters "S," "T" or "T" in "WASHINGTON," select 25 names from the Master List, so that the letters, when interlocked, will spell cor-rectly the names chosen, and will fill ALL the helter surgest for exemple. Statt the blank letter squares. For example: Start-ing with the "I" in "WASHINGTON" it is easy to see that the correct name for this nine-letter section is "INDONESIA."

Every letter is given a definite point value (see letter values at right); but each time a letter is used to interlock two words, such letter is given DOUBLE its regular value. No name may be used twice.

178 IS THE CORRECT ANSWER

The object is to select 25 names-in addition to "WASHINGTON" to that their total letter values including the "Key" word, will produce a Grand Total of exactly 898. In arriving at the Grand Total you must first score up the 19 individual horizontal line totals in the ladder-like column after which these 19 totals must be added together to obtain the Grand Total of 898. If you select the correct 25 names, and score up the letter values without mistakes, your Grand Total will be exactby 896. However, if your solution does not core up to 898 on your fine try, you must
