### PRIMER? ONE COAT? TWO COATS?

That's what we're here for!

Before you paint your house, consider the condition of the surface and the years of protection you expect. For long-range economy, use a first coat of Pratt & Lambert House Paint over an old paint surface that does not show scaling or checking. Then apply a coat of P&L House Paint.

True, a one-coat job over an old surface in good condition will give satisfactory results but it will not give the years of lasting service a two-coat job provides. And on new wood, a coat of primer and two coats of house paint are always better.

Above all, use Pratt & Lambert House Paint and Primer for adequate spreading, hiding and weather resistance. Remember, good paint is the smallest part of the cost of a paint job!

If you wish more information on this or any other paint problem, we are here to serve you.
