Mission Bouts Achieve \$13,000 For Missions

Aquinas Mission Bout Finals held last Thursday at the Sports Arena were acclaimed by many as the most successful to date.

Emerging from the event that brought the Catholic Missions over \$13,000, were 13 Champions, 11 new ones, ranging from the atomic to the heavyweight classes.

The highlight of the evening was the presentation of the Aquinas Mission Bout Award to Carmine Basilio.

IN THE FEATURING contest of the evening, champion of the middleweight division, Dick Tierney, proved his worth by defeating football star Hank Angelson for the second year in a row. This made Tierney the first boy to win the Ray Hickok Trophy, for the most outstanding fighter of the night.

The other champ who retained his crown was lightweight Dave Hogan, Hogan TKO'd Tom Elphick to keep his title.

Bantamweight champ Dick Corbett lost a close decision to senior Dan Culhane in their three round go.

Other winners were: Larry Nicotelli, Dick Nicolay, Jerry Quigley, Jim Mooney, Tom Aman, Bob Fleming, Emmett Neary, Mike Wade, Jerry Flood and Bob Knight. Enright and Ricci won by a KO and a TKO respectively, in a couple of the evening's best fights.

Sister Maria Augustine To Present Paper

Sister Maria Augustine, chairman of the Chemistry Department of Nazareth College, will present a paper at the 127th national meeting of the American Chemical Society, now being held March 29 to April 1, in Cincinnati, Ohio.

Subject of her paper is the inhibition of enzymes by heavy mercury compounds and is a report on chemical research which she has done on respiratory enzymes found in living things.

According to Sister Maria Augustine, enzymes are organic catalysts which, in this case, give the necessary speed to oxidation processes in plants and animals, including man, to keep life going.

Since these processes are complicated making it difficult to study, an intact system of enzymes, a method has been devised of introducing substances called inhibitors, that block a particular step. From such studies information about the system can be deduced.

In her research, Sister Maria

Augustine has prepared nine new compounds, in organization which she has prepared as a means of contact among Catholic scientists to promote the literature and more productive scholarship and she has studied their effect as a greater participation in scientific activities by Catholic scientists and to assist Catholic scientists in relating the Church's teachings to the findings of the meeting of the American Chemical Society.
