# **Churchill As Author Falsifies** Facts Of Reformation In England

#### By REV. HENRY ATWELL

One of the men who played so prominent a role in the roots of present day turmoil is Sir Winston Churchill. Britain's war time prime minister. His decisions and concessions helped give Soviet Russia its hammer-hold on Hungary, Poland, and the rest of eastern Europe,

Since his retirement, Sir Winston has been vigorously at work on his "History of the English Speaking Peoples." Life magazine, serializing the story in a condensed version, recently presented Churchill's chapter on the Protestant Reformation in England.

He has no intention of attacking the Catholic Church as we know it today, but he describes the Church of the 16th century with anecdotes and phraseology which give a very inaccurate picture of that period.

For Churchill, the Beformation was kitle more than changing a Latin prayer book and bible into Kaglish. Once the people had these two books in their own language, he tolls us, they wanted no more of Pope or Catholician.

As a point of historical fact, Henry VIII's Archbishop Thomas Cranmer.
