Fitting of Frames Test of Patience

BECAUSE eyeglass frames are bigger and bolder than ever these days, the estimated 10,000,000 American women who wear glasses often have trouble in selecting the frames that suit them best.

First of all, you should think in choosing a frame, you should think in choosing a frame that will give you the best appearance. You will probably find that your eyes are better served by a round or oval shape than by a square or rectangular one. You should also think in choosing a frame that will give you the best appearance. You will probably find that your eyes are better served by a round or oval shape than by a square or rectangular one.

Remember that your glasses will always be the focal point of your face. They can be beautiful and beautiful. They should not be fussy.

Waldert Fashion Centers

The ABC's of Comfort

This group is studying ways and means of making you and your family more comfortable. You see, these men are heating contractors taking a special evening course at the Rochester Gas and Electric's Appliance Training School. Besides training RG&E servicemen, special courses are frequently conducted at the school for groups like this to bring them up-to-date on the recommended procedures for installing and servicing gas appliances and furnaces. Qualified men like Lloyd R. Nellis of the RG&E's Gas Heating Service Department do the "teaching." The "students" give up precious evening hours to attend. All are interested in bringing you greater comfort and more convenience from your gas appliances.
