**NO FLUE NEEDED**  
when you heat water electrically

**One-Piece Top—Needs No Flue**  
Because nothing burns, an electric water heater is clean and requires no flue. And for efficiency, an electric water heater is tops because 94% of all energy produced goes directly into the water.

**Put an Electric Water Heater Anywhere**  
By placing your electric water heater close by the kitchen you get hot water quicker because less water cools off in the pipes. You save on reheating costs, too.

**Savings in the Tank**  
Hot and cold water mixing in the tank is practically eliminated by this baffle plate. Hot water stays hot for even greater savings.

**Electric Water Heater Night-Rate Saves Money**  
Electric water heaters on the night rate operate from 11:30 P. M. until 7:00 A. M. at a rate which averages over ONE CENT A KILOWATT-HOUR lower than the average day rate. A separate meter dial records the electricity used by your water heater during the night rate period.

**GET ALL THE FACTS BEFORE YOU BUY. COMPARE OPERATING COSTS AND YOU'LL CHOOSE AN ELECTRIC WATER HEATER FOR LOW-COST SUBURBAN AND RURAL HOT WATER HEATING.**
