Minds, too, need cultivating

Nourish the mind, and the harvest can be bountiful beyond all measure.

Our nation, up to now, has been richly rewarded for the quality of thought nourished in our colleges and universities. The kind of learning developed there has made possible our American way of life.

Today these colleges are facing a serious crisis. Low salaries are driving away many gifted teachers. This other factor, many classrooms are seriously overcrowded. And by 1967 enrollments are expected to double!

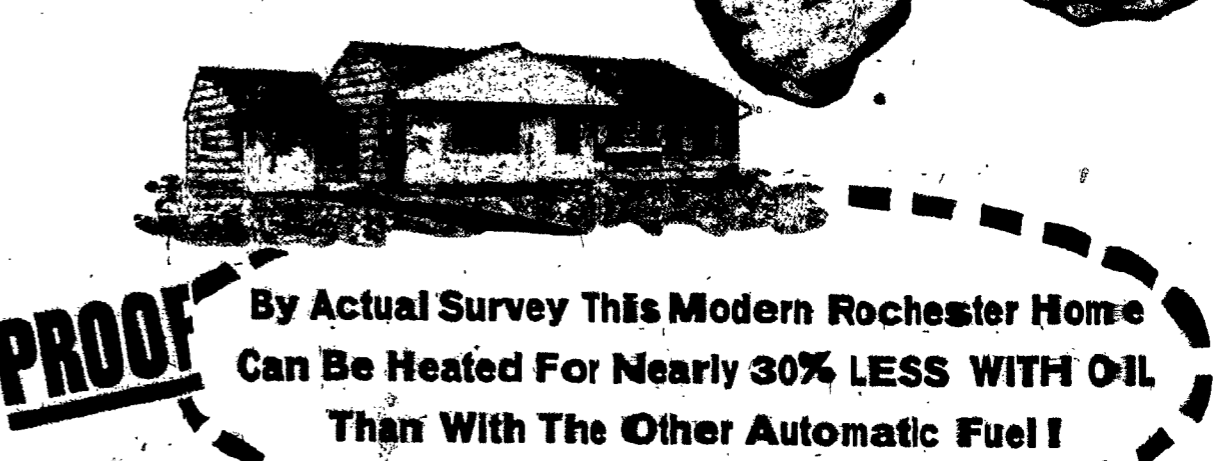

Our institutions of higher learning are doing their best to meet these challenges. But they need help. Help the college of your choice, and help perpetuate the American way of life.

If you want to keep these great colleges alive, please write for a free booklet, "HIGHER EDUCATION: How to Save the Future," 300 Madison Avenue, New York 17, New York.
