

Fatima Secret Stirs Curiosity

By SUSAN LOWNBES MARQUES

Fatima — (NC) — The Bishop of Leiria still has not given any indication exactly when the final Fatima secret will be revealed.

Bishop Joao Pereira Vazancho, whose diocese includes Fatima, stated last year he would open the sealed account written by Sister Lucy, which he will send to Rome for scrutiny by Vatican officials before releasing its contents. The Bishop himself means him to be the sole survivor of the three children to whom the Blessed Virgin appeared in 1917 at Fatima.

Mary here believe that the envelope containing the secret will be revealed about the end of 1960, the anniversary of Mary's first appearance to the three Portuguese children, October 13, the anniversary of the final apparition.

Some believe the secret will be made public in Rome rather than at Fatima.

The theme of the final conversion of Russia runs all through the Fatima revelation from the apparition in July 1917.

UN Delegate

India Population Boom 'Nonsense'

Cleveland — (NC) — India's "population explosion" is pure nonsense, possibly started for political reasons to affect coming U.S. presidential elections, a former Indian delegate to the United Nations said here.

Betti Sha-Gilani, former member of India's Congress and now visiting professor at John Carroll University here, said that within the next few years and certainly by 1965, India will be a surplus producing country and a possible threat to export nations like the U.S., Canada and Australia.

"Family planning schemes now under way could destroy India's emerging new middle class," Mr. Gilani warned. Before his UN appointment, Dr. Gilani was secretary to the Minister for Development in India, and secretary to the Minister for Defense of India. He spoke at Case Institute here.

"The American people are given only part of the story by the secular press and other media," the Indian statesman warned. "We are led to believe that the population of India is growing 3.7 per cent each year. The number of deaths is not reported. The death rate reduces the real growth rate to 1.7 per cent, actually less than the 2.5 per cent growth rate in the U.S."

"INDIA IS POOR," of course, Mr. Gilani said, "but Americans get a misconception of that poverty. It is not as general as violent as pictures would have you believe. Emphasis on our poverty has reached such proportions in the U.S. that it looks as if foreign aid alone is keeping us from going down the drain."

"Indian agriculture is, on the average, only one-quarter as efficient as America's. Think of what will happen when India's
