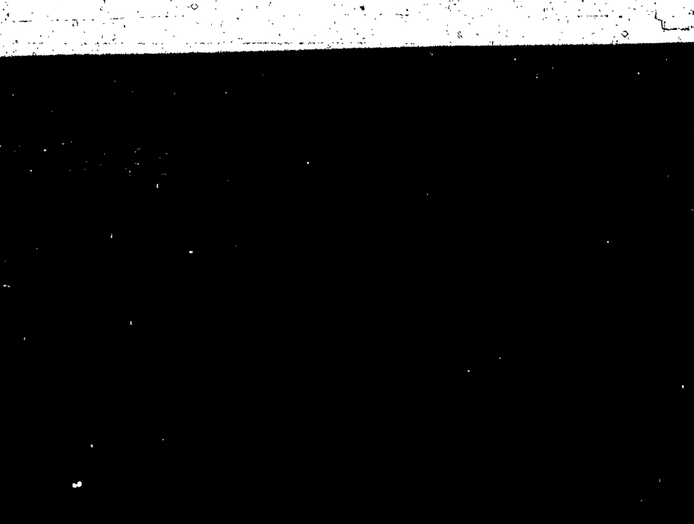
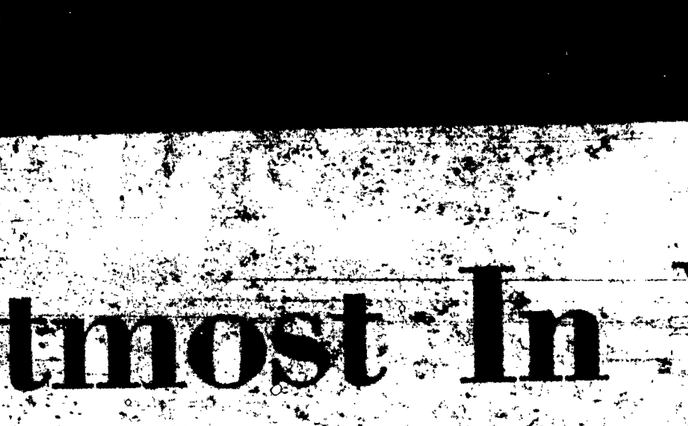
Utmost In Value!



The "Recreation Room" can be one of the most important areas in your home. It can retain its original function as a room for youngsters, but can also be a room for "grown-ups" . . . the larger parties . . . for a hobby . . . for family activities in winter . . . as a cool retreat in summer. Your Schantz Home "Recreation Room" can be planned to give you and your family a happy and satisfying entertainment center.



Heating units, whether you use oil or gas, are compact, space-saving, designed to give you efficient heat at the lowest possible maintenance and operating cost. You can choose from "custom-installed" baseboard, warm air or a hot water system.

The rugged, extra quality construction of basements in Schantz homes assures complete insulation against cold and dampness. You can plan for immediate or future conversion to a snug and cozy work, play or living area.
