Electric Cooking

Meals can be sleepy-eyed, too. Tired. Weary.  
The same old taste, day after day.

Reason: many cooks lack confidence in their range.

But things are different when you own a modern, fully automatic electric range.

For one thing, you have complete control over the temperature you select. It can't vary — it's exactly the same every time you use it. And there's a temperature setting just right for every cooking job. No guesswork. No annoying temperature adjustments.

You can see the 1960 electric ranges at your electric dealer's any time. But why wait? See them this week.
