The objective of the course is to provide a basic knowledge of the Russian language, so rapidly becoming an important factor in modern education. The interest of the students in mastering this rather difficult language, for which they have had to learn a new alphabet and script, is intensified by the firsthand knowledge of their teacher.

Mrs. Sabalis, who speaks five languages fluently, explains to her students the fine points of Russian by illustrations from everyday life, as well as from the classic authors of the country. She stresses the fact that the students will be able to read this unusual language with time and concentration, confidence.
