Like Magic...
 the way a FEDDERS Dehumidifier removes moisture from your basement

You'll think you're performing magic when you see the amount of water a Fedders Dehumidifier removes from your basement. Actually all you do is set it and forget it! Moisture is removed automatically! It's as simple as this: When humidity rises, moisture in the air increases... when it reaches the danger level your Fedders Dehumidifier turns on. When moisture is removed, it shuts off.

Although you can't actually see moisture damage occurring, it's taking place right before your eyes! Then after it's too late, you discover walls and woodwork are warped out of shape, tools and appliances are rusty, clothes stored in your basement become mildewed and musty—even leather goods rot.

Avoid moisture damage with a Fedders Dehumidifier. Like magic—it removes water. Call us—order yours today.
