G-E Filter-Flo Washer

Featuring 16 lb. Capacity--Mini Basket, too!

From big loads of denims, to little loads you'd normally wash by hand--GE does it all perfectly!

From tough, soiled work clothes to delicate wash-n-wear fabrics, this G-E Filter-Flo Washer gets them truly clean. In the NORMAL SPEED, the spiral activator loosens dirt and soil with a vigorous washing action. For your added convenience, a special SOAK CYCLE pre-washes heavily soiled or stained clothing.

Because special attention must be given to wash-n-wear and delicate fabrics, this G-E washer also features a separate SLOW SPEED. Synthetic garments are washed and rinsed at a safer, slower speed. Clothes come out less wrinkled--easier to iron. This gentle action is easier on your clothes--saves you money, too!

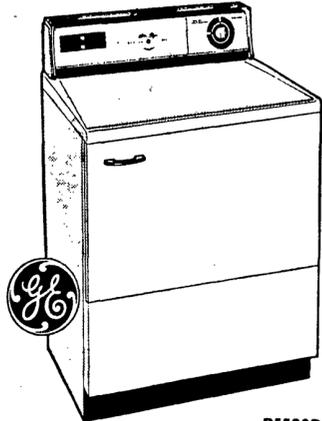

Besides the many benefits of a two-speed washer, this model also features G-E's exclusive Mini-Wash system. It's perfect for any small load--save hot water and detergents, too.

Fluffy, Dry Clothes in

Any Weather!

DE520D

Matching High-Speed Electric Dryer

A G-E dryer completely eliminates the bothersome chore of hanging clothes on a clothesline. With a simple flick-of-a-switch and a twist-of-the-dial--your clothes are dried soft and fluffy. A clean, fresh flow of warm air gently tumbles through your clothes until they are dried just the way you prefer--damp dry for ironing or completely dry for storage. G-E's convenient three-heat selection lets you choose the proper drying temperature for each type of fabric. There's HIGH for regular cottons and linens, LOW for delicate garments and FLUFF which allows clothes to rotate without heat. It's perfect for fluffing pillows, dusting draperies and slip covers for freshening clothes just out of storage.
