OUR LADY OF LOURDES

The Basilica of Our Lady of Lourdes, France, was erected as a memorial to the Blessed Virgin who appeared to St. Bernadette Soubirous, a 14-year-old French peasant girl in 1858. Near the basilica is the grotto where many cures have taken place. The basilica and the shrine attract over a million persons annually. This year, Lourdes will be one of the main centers of devotion to the Blessed Virgin in honor of the 100th anniversary of the proclamation of the dogma of the Immaculate Conception.

For the pleasure
of your company:

Pour Chateau LaSalle at dinner... or any other time of the day. Highly entertaining just chilled. It's also a great mixer in tall, cool drinks or short punchy ones. Very sociable over ice as a cocktail. No wonder The Christian Brothers put this light, naturally sweet California wine in a decanter instead of an ordinary wine bottle!

Review Board Urged

Chicago—(RNS)—The Association of Chicago Priests (ACP) has called for the establishment of a professional review board to her parties involved in ecclesiastical controversies with those in authority. The action attended by 700 priests. ACP indicated its concern for the right of each Catholic to get a full, fair hearing in accord with what would be considered due process of law.

The Water Heater for the Growing Family

Active growing families need lots of hot water. There are many, many baths, many washings and much cleaning to be done. And, as the family grows, so does the number of helpful appliances to make life easier. Soon an automatic dishwasher is added, then a new and bigger washer — all to keep you, your family and your home as neat as a pin.

But many times, as your family increases, your old water heater seems to shrink. You find you're running out of hot water in the middle of a shower, or the water isn't hot enough for the second batch of clothes. If this is the case, now is the time to switch to the water heater that grows with your family — an A. O. Smith Permaglas gas water heater.

Because A. O. Smith is quality constructed throughout, it's able to keep up with your increasing demands. The glass lining is built to take numerous changes that occur when converting cold water to hot. And the thick blanket of insulation keeps the hot water in the tank — where you want it!

So, if your old water heater can't keep up with your growing family — stop in and see us. We'll see that you get an A. O. Smith that grows with you.
