### Abortion Law

Editor:

New York's new abortion law goes into effect on July 1. It has been estimated that from 100,000 to 500,000 children will be killed each year as a result of this bill — enough people to make up a large city; more Americans than were killed in Korea and Vietnam combined.

It is literally true that the lives of millions of unborn children depend upon our efforts between now and November.

There is only one way we can save their lives. We must demonstrate clearly that large numbers of voters are in revolt against this law. How? By defeating a great number of those legislators who voted for abortion, and by electing legislators who favor laws to safeguard the lives of the unborn. If we do this, we can reverse the trend in New York. If we do this, we can give an unmistakable message to the legislators in other states.

Such an effort requires an organization, and that is what our committee is trying to develop. As a first step, we hope to gain a place on the ballot in November, labelled "Right to Life" with our emblem a baby. If one of the present candidates for governor is willing to speak out strongly for the protection of the unborn, we could back him. Or we could run our own candidate to bring the anti-abortion position before the electorate.

To achieve our goal, we need help from people in every part of the state. If you are willing to help launch an anti-abortion movement, please write to
