

We have seen the contributions to our State and Nation of parochial schools. This great school system has been developed through the sacrifices of our Catholic families.

It is our belief that in a pluralistic society, the two systems of public and parochial schools must be helped in every way possible.

What Has Been Done

We expanded state aid to parochial and private school children for transportation and other aids, and initiated aid for textbooks. This aid now amounts to over \$40 million a year.

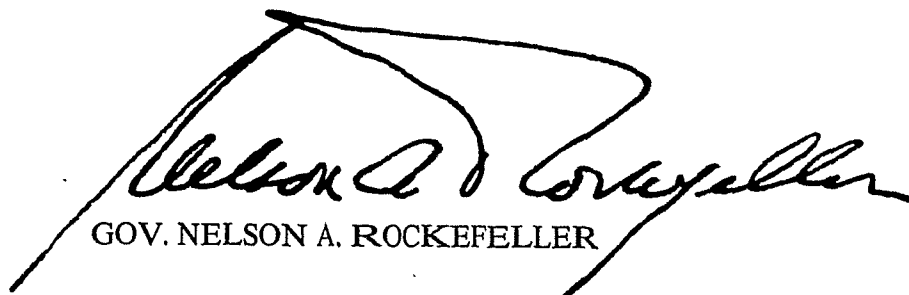

We obtained first approval, by the 1970 Legislature, of a constitutional amendment to repeal the Blaine amendment.

We began a new program in 1970 providing \$28 million more in direct state aid to parochial and private schools — the first time this has ever been done in the history of the State.

For The Future

We pledge our continuing efforts to give financial assistance to meet the costs of parochial school education.

This is our record. You can trust us in this matter. Now we need your support on November 3.
