**Model FPD121TN  
Frost-Free  
Refrigerator-Freezer or  
Model RSE36P  
Electric Range  
with Self-Cleaning Oven**

That dreary old job of defrosting is gone forever in this 100% frost-free refrigerator freezer. It's compact but it holds a lot; 106 pounds in the freezer and over 9 cubic feet in the refrigerator. A roomy door shelf holds bulky cartons and cans, and you can put more than 25 quarts of vegetables and fruits in the full-width hydrator. A sliding shelf makes getting things in and out easy. Nylon rollers are available at extra cost.

You'll be rid of another tedious job when you pick the Frigidaire Range with the self-cleaning oven. All you have to do for a sparkling clean

oven, and burner drip pans as well, is close and lock the oven door, and set the dial to "clean." The burner controls have 6 marked settings and infinite variations in between so you can get the exact heat you want. The range practically cooks all by itself, with a timer that turns the oven on and off for you. There's one on the appliance outlet, too. And, the full-width drawer is great for storage.

Both of these appliances are available in white and also in avocado, copper or gold, while they last, at no extra cost. Remember there will be no more at this one low price after these are sold, so hurry!
